Description:

Chelva was one the largest and oldest human settlements in Vergucht. Ran by Captain [[Nicolae Ironhide]]. The city itself adhered to strict (almost draconian) rules and laws. Now it has become a city teeming with the undead. The citizens that once inhabited it's walls have fled away from the city, seeking refuge and hiding in the surrounding area.

Adventure Hooks:

- The city may be in ruins, but for those crafty and brave enough there may still be hidden treasures in the rubble of the fortress.
- Nicolae Ironhide is doing his best to keep the refugees calm and in order, but this can't last long. He needs people to infiltrate the city and scout it, so he can begin a crusade to take back their home.
- The displaced citizens of Chlva are getting restless, the living conditions they have to suffer through are intolerable. Nicolae want you to convince some of the other cities in Vergucht to lend a hand to help house, or give supplies to the distraught citizens.

Overview:

Captain Nicolae Ironhide once ruled over the city of [[Chelva]] in [[Vergucht]], located in southern [[Tedran]].<ref>Various Authors. "Vergucht Feb 20". History:

Once an Ishmihan soldier, Ironhide was sent to overtake a small fort in Vergucht. Though the campaign was successful, he and his men were tasked with staying in what would eventually grow to become Chelva. His then captain, Captain Judas Bragg, would grow tired of Verguchtian life after a few years and eventually would barter a deal with a small branch of the [[Dīrātājs Tribe|Dīrātājs orcs]]. In exchange for the city, he would give gold, a new identity, and most importantly, no witnesses to ever speak of his betrayal. Nicolae learned of these plans and eventually killed his captain. Taking up the mantle and duties, Nicolae continues to keep the people of [[Chelva]] as safe as he can.

While his role as a guardian have proven largely successful, constant attacks by undead hordes that roam across Vergucht eventually broke through the walls of the city. Nicolae took up arms to escort the citizens outside of the city, but retained lingering injuries as a result of his heroic deed. After holding off the undead for his people to escape Nicolae trudged after them collapsing in a bloody heap after setting up a temporary camp in the forests of Vergucht.

Adventure Hooks

* Nicolae's injuries are bad, very bad, even the best healers would be hard pressed to help him now. Local legends speak of a magical beast that is capable of curing any injury. While descriptions tend to vary, one prominent aspect never changes: the presence of a single dazzling horn.
