

The At Home Skin Care Devices That Really Work

If you've been paying attention to the recent trends in skin care, you've no doubt heard of LED light therapy as a non-invasive spa treatment for a variety of skin care concerns. Providing targeted anti-aging changes, LED light therapy is backed by research and proven to reduce the appearance of fine lines and wrinkles, boost skin's radiance, get rid of dark pigment, and more.

Because LED light technology has been such a game changer for people around the world we'd love to tell you how at Celestolite, we've harnessed this powerful LED light therapy technology and developed Celestolite devices for skin care that are safe and effective for use at home. And now, you can try this amazing treatment for yourself.

We have designed and developed handheld Celestolite devices for skin care that you can now incorporate into your skincare regime to treat a variety of skin concerns.

Our Celestolite devices for skin care give our loyal customers the opportunity to receive the benefits of advanced LED technology from the privacy of their own homes. You'll reap the benefits of this proven anti-aging therapy with the targeted results delivered by these devices. You can use these devices from the comfort of your own bathroom, no trip across town or spa appointment required!

We've developed our devices using carefully crafted designs embracing this buzzed about powerful technology with proven results. Safe and effective for home use, our devices stand above the rest.

Intrigued? Read on for more information about our fantastic LED light therapy devices which we've designed to effectively treat a variety of your skin concerns. They can improve and transform your skin delivering confidence boosting results that last.

Trust us, you won't want to miss this!

But first, we'd love to tell you a little bit more about LED light therapy and why it's been a total game changer in the world of skin care.

LED Light Therapy and The Future of Skin Care

At Celestolite, we believe in providing our customers with out-of-this-world skin care and gorgeous results.

LED Technology has been supported by board certified Dermatologists across the globe and has been used in the spa skin care and beauty industries for decades. Spa treatments with LED technology have been shown to deliver powerful, amazing results - but with often painful, daily appointments for treatments.

But Celestolite devices for skin care are powerful enough that daily exposure is not necessary. Because of our research based design, our customers receive fast, spa-worthy results that turn heads. All without the pain and discomfort of invasive treatments or inconvenience of daily appointments at a spa.

You can count on these devices to be problem focused. They deliver targeted, noticeable changes to your aging skin within minutes. **LED treatments work in the deeper layers of your skin, layers of creams and serums can't touch. We've designed each of our Celestolite devices for skin care work gently yet powerfully to stimulate specific changes below the surface to the deeper levels of your complexion.**

Perhaps best of all, you'll find that our devices feature more than one mode. Having multi-mode devices enables our customers to select from their choice of targeted treatment all using the same handheld device from the convenience of their own homes.

Sounds amazing, doesn't it? Below, we'll give you all the details on each of our Celestolite devices for skin care and why we think you'll want to grab one for yourself, today!

Torche V2+ Amber Light

First up and a favorite on our list we've got our [Torche V2+ Amber Light](#). This device is our best selling handheld LED light treatment that harnesses the powerful benefits of Amber LED light and delivers focused treatments to the skin. **If you're looking to preserve and restore a healthful, youthful appearance this one is for you!**

Our Celestolite Torche V2+ Amber Light uses non-abrasive LED light and heat technology. It's a completely one of a kind device that works to address your aging skin concerns such as redness, dark spots, inflammation. Backed by research and safe for home use, this device works using the powerful effects of amber LED lighting to rejuvenate your skin, making it look young and vibrant.

Don't let the fact that it can be used at home fool you. This handheld device packs a powerful punch of skin rejuvenating goodness.

The Torche V2+ Amber Light Treats:

- **Redness**
- **Skin Inflammation**
- **Sun damaged skin**
- **Fine lines and wrinkles**
- **Patchy, uneven skin**
- **Dullness**
- **Stubborn dark age spots**

Amazing, right? Let's talk a bit about how this device follows through on its promises.

Well, our [Torche V2+ Amber Light](#) device works on your skin by delivering controlled amounts of amber LED light to the areas you treat. Using amber LED light and heat technology, it brings changes to your skin at the cellular level. The amber light stimulates the cellular activity *below* the surface level of your skin treating your skin in ways that serums and creams can't.

Getting your skin cells to increase their level of activity means a terrific boost of collagen and elastin production that you're aging skin needs. At the same time this boosts your circulation. This device works painlessly yet fearlessly on the damaged and aging areas of your complexion with precision.

The Results You Can Expect From the [Torche V2+ Amber Light](#):

- **Skin that looks more youthful and vibrant.**
- **Skin that looks and feels rejuvenated and refreshed.**
- **A balanced complexion**
- **Redness, inflammation, and the appearance of dark dark spots is visibly reduced**

Because of our research and careful, out-of-this world design, this innovative handheld device has the power to transform the appearance of your skin.

Maybe most impressive of all, your Celestolite [Torche V2+ Amber Light](#) delivers on its promises within minutes. We recommend using it just 4-5 times per week for just 3-5 minutes per treatment area as part of your skin care regimen.

Ready to read about more Celestolite devices for skin care?

Next up, we bring you the answer you've been looking for to something that has been bothering you lately. If you've been wondering how to approve the appearance of your neck, you won't want to miss this!

Photonix-3 Neck Solution

When it comes to our skin care regimen, sometimes remembering to address the needs of the skin on our neck and chest area is hard. When we begin to notice some aging changes to the appearance of these exposed areas however, we remember them.

Fortunately, at Celestolite we're experts at using modern advances in technology to treat your décolletage, or neck and chest area. With our [Photonix-3 Neck Solution](#), we've used innovative light therapy technology to create our Celestolite devices for skin care that will give you the ability to bring more youthful changes to your neck and chest area from the convenience of your own home.

The Photonix-3 Neck Solution treats:

- **Wrinkles and fine lines**
- **Drooping skin**
- **Loss of collagen and elastin**
- **Dry, aging skin**

You might be wondering about collagen and elastin and why it's so important for your skin, in this case, your neck.

As you age, your body decreases its production of these proteins which leaves your skin looking less plump and loses its elasticity. This results in a saggy, haggard appearance. Your skin also begins to look thinner and starts to develop aging fine lines and wrinkles.

You need to increase the production of collagen and elastin to flaunt a firm and youthful neck.

We've developed our Photonix-3 Neck Solution, as well as our other Celestolite devices for skin care, to address your dwindling supply of collagen and elastin. This device features two safe and effective easy-to-use modes to restore the plump, line free appearance to your neck.

The first mode is the **Massage Mode**, which gently encourages the production of collagen and elastin in these areas for a more smooth and firm appearance.

The second mode is a **Magnetic Heat Lifting Mode**, which stimulates the growth of [fibroblasts](#), which secrete collagen proteins that help plump and smooth out fine lines and wrinkles.

With the use of both red and blue LED light in this device, you can now transform the aging appearance of your décolletage using your Celestolite [Phototonix-3 Neck Solution](#) in moments!

We recommend using this amazing device for up to three seconds per area. You can use it morning or evening, and count on achieving youthful results.

Impressed with our devices but still wondering what other revolutionary devices with professional grade light therapy that we've got to unveil? Keep reading! Below, we've got the information you're looking for about our [Photonix-2 Eye Wand](#) and why you'll want one today!

Photonix-2 Eye Wand

Because no one wants to be told they look tired when they've gotten a fantastic night of sleep, you can count on our [Photonix-2 Eye Wand](#) to be the holy grail device for restoring the appearance of the sensitive eye area. Using LED light and heat technology, this device takes care of those stubborn fine lines and that perpetual puffiness around your eyes.

Environmental stressors, pollutants, and the sun can leave the thin, delicate skin around our eyes looking worn, lined, and puffy. And we can't hide it. Our eyes can be one of the first areas to reveal a lack of sleep, illness, and poor diet or lifestyle choices to the world.

If your eyes are starting to show signs of stress and environmental exposure, you're likely looking for something more than the many eye creams you've tried that haven't helped.

With two amazing LED light therapy functions, our [Photonix-2 Eye Wand](#) addresses these concerns specific to your delicate eye area.

The Photonix-2 Eye Wand Treats:

- **Puffy eyes**
- **Crow's Feet**

- **Fine Lines**
- **Dull, aging Skin**

Similar to our [Photonix-3 Neck Solution](#), this device has two modes which each target the sensitive skin around your eyes.

The first mode uses LED light therapy to eliminate toxins from your skin reducing the puffy appearance in the area and brightening the skin.

The second mode uses red light waves that stimulate the production of [collagen](#) and elastin, improving the appearance of fine lines, wrinkles, and crow's feet.

We recommend using our Photonix-2 Eye Wand for 5-7 minutes just 2-3 times per week as part of your skin care regimen for a more youthful eye area.

In Conclusion

Now that we've discussed everything there is to know about our LED light therapy Celestolite devices for skin care and how each of these devices can transform the aging appearance of specific areas of your complexion from worn, dull, and uneven to youthful and radiant, we hope you're ready to try them out for yourself. We've also covered how harnessing the powerful advances in skin care technology for use at home has made our brand stand above the rest.

Featuring dual modes for tailored treatment, one or all of our devices might offer the solution you've been looking for! Aging skin becomes a part of your past as you use our devices from the convenience of your own home!

At Celestolite we listen to the concerns of our customers and have carefully developed each of our devices to provide targeted treatment for your skin concerns. Our goal is always to provide you with breathtaking results guaranteed to turn heads and boost your confidence. As with all of our products, our devices treat your skin with the safe and effective benefits that you have come to expect from us.

Also important is that aside from caring about your skin care needs, at Celestolite we are concerned about our earth, as well. For this reason, all of our products are developed ethically and shipped in recyclable packaging.
