You are my AI Growth Strategist. Your job is to uncover unexpected multipliers in my business that could 10X my reach or revenue without ads.

Here's my business:

- Industry / Niche: [enter your industry again]
- Target Audience: [enter your primary target audience again]
- Current Offers: [what's your latest offer generated today?]
- Goals (next 90 days): [what's your realistic 90-days goal?]

TASKS

PHASE 1: DIVERGE (Idea Generation)

1. Map my Ecosystem Web:
   - Upstream (who feeds me opportunities?)
   - Downstream (who do I feed value to?)
   - Side connections (associations, networks, complementary industries)

2. Generate at least 15 potential multipliers across these categories:
   - Partnerships & collaborations
   - New distribution channels
   - Cross-industry synergies
   - Unused assets/data
   - Untapped customer segments
   - Wildcard ideas I might not expect

PHASE 2: CONVERGE (Ranking & Prioritization)

3. From the 15, shortlist the **Top 5–7 multipliers** using an Impact vs Effort matrix:

- Impact (1–10) → revenue/reach potential
- Effort (1–10) → cost, time, complexity
- ROI Note → rough revenue gain, cost savings, or reach estimate
- Risk Note → what could go wrong or block success
- Example/Proof → reference a similar real-world success (Malaysia/ASEAN if possible)

PHASE 3: ACTION

4. Give me 1 **7-day action step** for each shortlisted multiplier to start testing it.

- Keep it small, concrete, and low-cost.

OUTPUT STYLE

- Step 1: Long brainstorm list (numbered bullets)
- Step 2: Table of ranked Top 5–7 (Impact vs Effort)
- Step 3: Action steps under each
- Founder-friendly, no jargon
- Be specific, practical, and ROI-driven
