

How to Link to a Page

(Text Field)

With the new update, users can add links to any page on any text field with a couple of clicks. This is fairly straightforward, but I've outlined the steps below.

Instructions Only

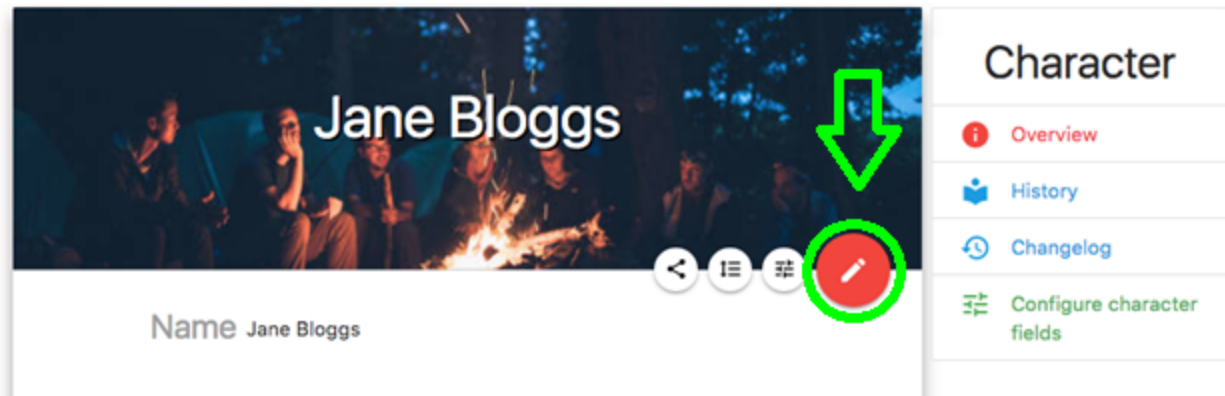

(To go directly to instructions with screenshots, click [here](#).)

1. Navigate to the page you wish to edit and click the **Edit** button. *(It can be found underneath the page header on the right and looks like a pencil.)*
2. Go to the text field where you wish to add a link.
3. A row of **Add Link** buttons should appear along the bottom of the text field. Click the one that corresponds to the type of page you wish to link to see a dropdown list.
4. Select the page you wish to link to. A link code will appear in the text field.
5. Save your changes by clicking on the **Save** button. *(It can be found underneath the page header on the right and looks like a floppy disk.)*
6. Your link will now be visible.

Happy worldbuilding!

Instructions with Screenshots

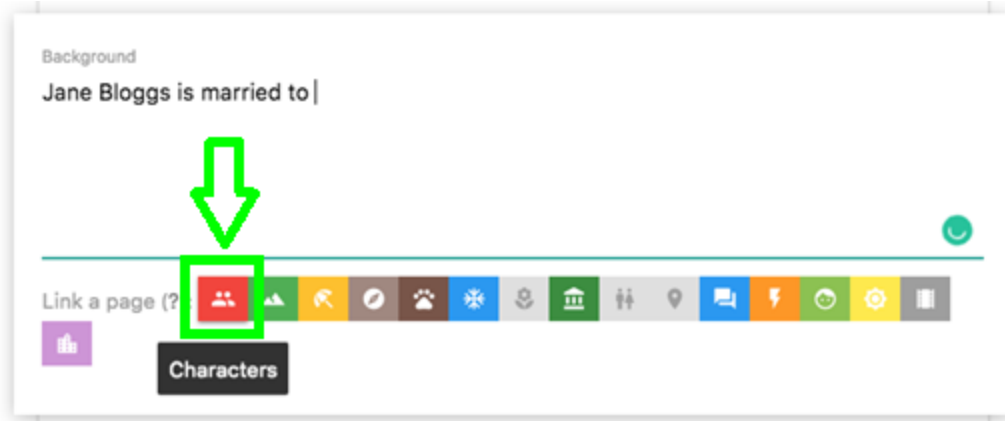

1. Navigate to the page you wish to edit and click the **Edit** button. (It can be found underneath the page header on the right and looks like a pencil.) For this tutorial I will be editing a character of mine, Jane Bloggs.

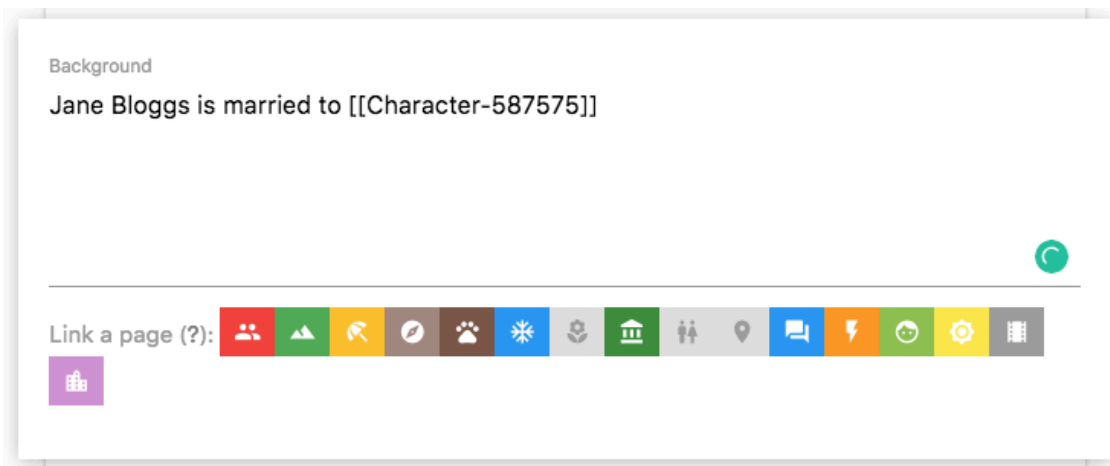

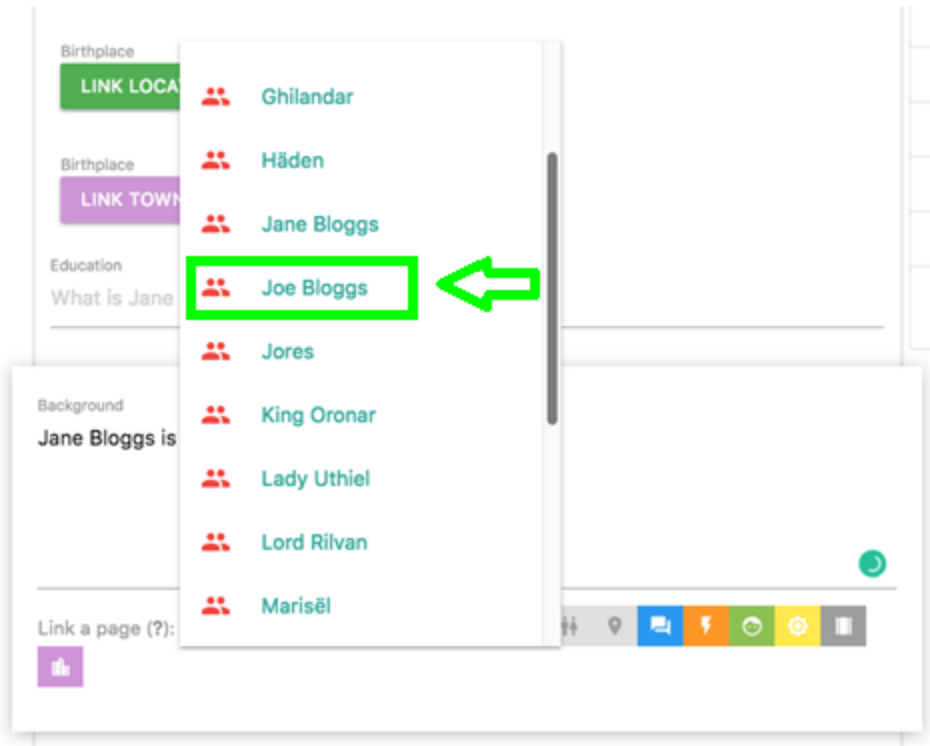

2. Go to the text field where you wish to add a link. In this example, I am going to edit her background.

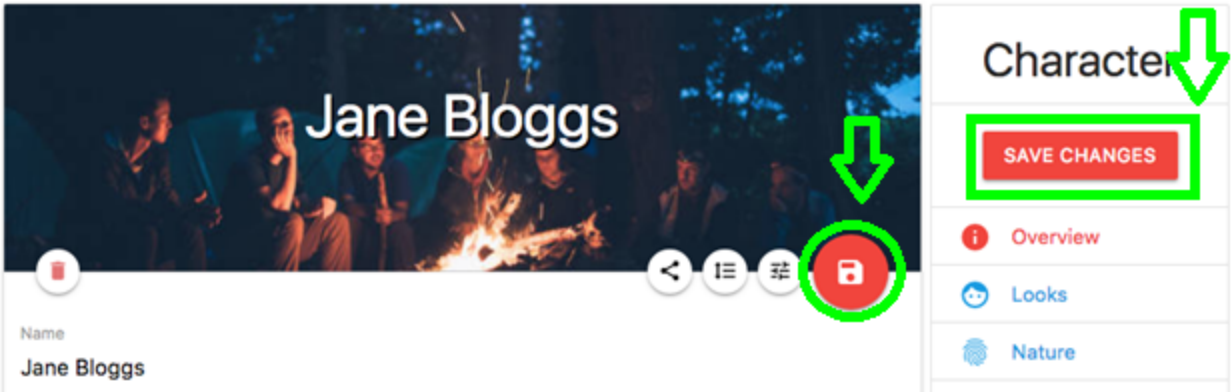

3. A row of **Add Link** buttons should appear along the bottom of the text field. Click the one that corresponds to the type of page you wish to link to see a dropdown list. I'm going to add a character link.

4. Select the page you wish to link to. A link code will appear in the text field. In this example, I'm picking Joe Bloggs.

5. Save your changes by clicking on the **Save** button. (*It can be found underneath the page header on the right and looks like a floppy disk.*) Alternatively, click on the **SAVE CHANGES** button to the right.

6. Your link will now be visible.

Background Jane Bloggs is married to  [Joe Bloggs](#)
