

Module Descriptions

Module designation	<i>Chemistry for High School</i>
Semester(s) in which the module is taught	3
Person responsible for the module	<i>Rr. Lis Permana Sari, M.Si.</i>
Language	<i>Indonesia</i>
Relation to curriculum	<i>Compulsory / elective / specialisation</i>
Teaching methods	<i>Lecture, discussion, project</i>
Workload (incl. contact hours, self-study hours)	<p>Total workload of the activity is 91 hours per semester for 16 weeks which consist of:</p> <p><i>100 minutes/week for class learning</i></p> <p><i>120 minutes/week for structured activities</i></p> <p><i>120 minutes/week for individual study</i></p>
Credit points	<i>2 SKS (3.2 ECTS)</i>
Required and recommended prerequisites for joining the module	<i>Chemistry curriculum study</i>
Module objectives/intended learning outcomes	<p><i>On successful completion of the course students should be able to:</i></p> <ol style="list-style-type: none"> <i>1. Demonstrate a responsible attitude, independence, and the courage to express one's own opinions and respect the opinions of others</i> <i>2. analyzing procedures in designing learning assessment, as well as test assessment techniques and instruments and non-test</i> <i>3. Determine procedures for developing valid and reliable cognitive, attitude, and skills assessment tests.</i> <i>4. Communicate the implementation of the principles of Assessment of Learning, Assessment for Learning, and Assessment as Learning in designing innovative chemistry learning assessments.</i> <i>5. Create student learning outcome report simulation according to school criteria and conduct program evaluations for the chemistry learning process at the school level.</i>

Content	<p><i>Chemistry Learning Assessment is a chemistry education discipline, which studies the problems of planning, implementing, and reporting the assessment of chemistry learning outcomes. Lecture material begins with the introduction of various terms commonly used in the assessment of chemistry learning outcomes, followed by techniques and instruments for evaluating chemistry learning outcomes, how to compile instruments for evaluating chemistry learning outcomes, processing assessment results, analyzing assessment instruments, and compiling reports. Various new approaches discussed in this lecture include the use of objective statements in the form of competencies, competency classification based on the dimensions of cognitive processes and alternative dimensions of knowledge and assessment.</i></p>																					
Examination forms	<p><i>Project report and presentation, written tests</i></p>																					
Study and examination requirements	<p><i>Minimum attendance at lectures is 75%</i></p> <p><i>Final score (NA) is calculated as follows:</i></p> <table border="1" data-bbox="619 797 1350 1106"> <thead> <tr> <th>Learning Outcome</th> <th>Weight (%)</th> <th>Technique of Assessment</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>5</td> <td>Participation</td> </tr> <tr> <td>2,3</td> <td>10</td> <td>Task</td> </tr> <tr> <td>1,2,3</td> <td>10</td> <td>Mid-term Test</td> </tr> <tr> <td>4</td> <td>25</td> <td>Presentation and Observation</td> </tr> <tr> <td>5</td> <td>25</td> <td>Project (report and presentation)</td> </tr> <tr> <td>1,4,5</td> <td>20</td> <td>Final exam</td> </tr> </tbody> </table>	Learning Outcome	Weight (%)	Technique of Assessment	1	5	Participation	2,3	10	Task	1,2,3	10	Mid-term Test	4	25	Presentation and Observation	5	25	Project (report and presentation)	1,4,5	20	Final exam
Learning Outcome	Weight (%)	Technique of Assessment																				
1	5	Participation																				
2,3	10	Task																				
1,2,3	10	Mid-term Test																				
4	25	Presentation and Observation																				
5	25	Project (report and presentation)																				
1,4,5	20	Final exam
