

This document has the first 7 stories of the [React Hotel Project](#) (link to [all stories](#))

What is being considered when rewriting the stories

1. Every key and mandatory story should have a light and simple User Story OR Background
2. Acceptance criteria should be written using [Gherkin](#)
3. Explicitly connect one or two early tickets to tests (will need TechEd help with this)

Issue 3

"url": "<https://api.github.com/repos/CodeYourFuture/React-Module-Project/issues/3>"

"title": "Feature: Card "

Current content

****Instructions:****

- [] Create a card component in components/Card
- [] Your card component should accept props and render an image, title, and url

****Test:****

- [] It should render a title
- [] It should render an image with alt Text
- [] It should contain or be a link

Proposed content

****Background****

<https://component.gallery/components/card/>

AS A React Hotel App User
I WANT to be taken to the correct link
SO THAT I can use the app correctly.

****Acceptance criteria/Tests****

Replace XYZ with the text or link you are using for each scenario

****Scenario: view title XYZ****

GIVEN I am on the React Module Project App

WHEN I see a card
THEN I can view the title XYZ

****Scenario: view alt text****

GIVEN I am on the React Module Project App
WHEN I see the card
THEN I can view the alt Text XYZ

****Scenario: link XYZ****

GIVEN I am on the React Module Project App
WHEN I click on the card
THEN I am taken to link XYZ

****Instructions:****

- [] Create a card component in components/Card
- [] Your card component should accept props and render an image, title, and url
