Does your wife really love you? If you're stressed all the time, the answer is probably no and here's why.

Email:

Women can smell when a man is stressed, it's one of their hard-wired abilities.

And if you can't control your fears and anxieties, there's a 99% chance she's going to leave you.

I'm going to be honest with you; she's surrounded by confident, fearless men that constantly remind her how fragile you are.

She works with them, she goes out drinking and the bar is full of them, she goes to the gym and they're everywhere.

So what are your options?

You either remain in your current sorry state - weak, helpless and unable to please your wife.

Or, you get a tight, immediate grip on your anxiety and fears and watch your wife drag you to bed 5 times a day.
