Finding The Statistics Of Our Favorite Sports Players (part 1)

Congrats! You have just have graduated college at the top of your class with a degree in statistics! You have just landed an interview with the best sports agency in the country. In order to land the job, the manager of the agency wants to make sure that you are knowledgeable in sports statistics. In order to do this, she wants you to calculate the stats of your favorite NBA or MLB player, build a presentation, and then present your findings to her. If she believes that you have done a great job with your presentation she will give you the job. Good luck!

Your job

- Pick a MLB or NBA player you want to research
- Calculate the five stats listed below
- Find the stats
- Build a presentation of the stats that you find

MLB Stats To Find

- Batting Average (Hitter)
- Steals Per Game (Hitter)
- Slugging Percentage (Hitter)
- Stolen Base Percentage (Hitter)
- Hits Per Game (Hitter)
- WHIP (Walks And Hits Per Innings Pitched)(Pitcher)
- Winning Percentage (Pitcher)
- Strikeouts Per Game (Pitcher)
- Walks Per Game (Pitcher)
- Earn Run Average (Pitcher)

NBA Stats To Find

- Points Per Game
- Rebounds Per Game
- Assists Per Game
- Blocks Per Game
- Minutes Per Game
- Field Goal Percentage
- 3-Point Percentage

Presentation

You will create a Google Slides powerpoint based on the stats you will find. On the slides you must explain what the stat is along with showing the math on how you got to your answer.
