EXPERIENCE

Freelance – *Web Developer*

– *Front End Static Website* || January 2021 – PRESENT || ([AmericoIPA](#))

- Designed and built a refined and simple webpage for referencing important information
- Used media queries, CSS, and Flexbox to create a dynamic view, no matter the screen size
- Built using React, JavaScript, CSS

Devmountain – *Full Stack React Developer (Student)*

– *Full Stack Developer* || August 3rd 2020 – PRESENT || ([TheaterLink](#))

- Designed a one-of-a-kind website for actors to connect to local theaters/auditions and browse and save videos for auditions
- Integrated a pinning feature using Redux and a strong backend to create an easy-to-use User interface
- Embedded Youtube using React-youtube to provide for easy access to audition songs and curated a list of videos that play seamlessly within web application
- Integrated a dynamic user profile that allows users to display their specific acting experience and select personal information

Tech Used: React, Express, PostgreSQL, Redux, Sass, Massive, CSS, Nodemailer, JavaScript

– *Lead Developer/Project Lead* || October 2020 – PRESENT || ([dono.](#))

- Developed a multi-sided web application for people who want to get rid of clutter around the house

- Implemented a rating system using React-Stars-Rating for users to rate and comment on interactions with each other
- Integrated a chat feature using Socket.io for users to interact with one another
- Built entirely in a remote environment with 3 other team members
- Created dynamic thumbnails that link to different views within the application based on where the user is within the donation process
- Utilized Amazon S3 buckets to create an easy-to-use method to upload photos with a unique URL

Tech Used: React, JavaScript, Redux, PostgreSQL, Sass, CSS, Express, Massive, Nodemailer, Socket.io, AWS Buckets
