

Simple Inscribed Angles 2 Name _____ Date _____ Per _____

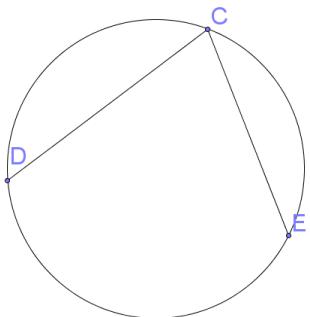

Reminder: the measure of the arc is twice as big as the measure of the corresponding inscribed angle.

1.

$$m\angle CED =$$

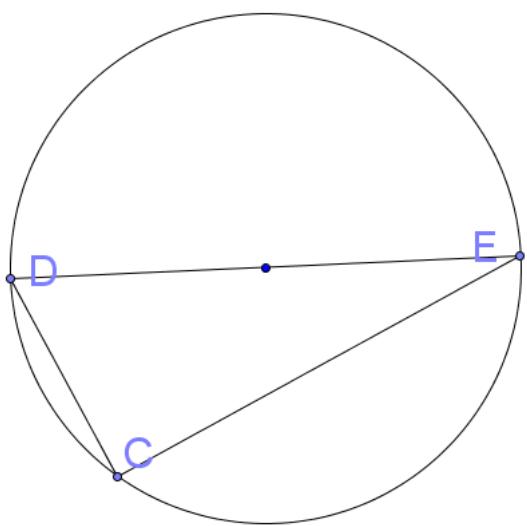

2.

$$\text{If } m\angle ECD = 140^\circ$$

$$m\angle ECD =$$

5.

If $m\angle ECD = 88^\circ$, $m\angle EDC = 62^\circ$, $m\angle DC = 60^\circ$

$$m\angle EDC =$$

$$m\angle DC =$$

$$m\angle CED =$$
