EMAIL SWIPE #4 (Mail AT 7PM EST)

Subject Line: This App Just Replaced An Entire Publishing Team

Hey,

Most ebook apps give you 10 padded pages and call it a book.
Then leave the hard part to you.

This one gives you the finished product — including the Amazon files.

Here is the truth about what publishing one book used to cost:

- ✓ A ghostwriter — \$1,000 to \$5,000
- ✓ An editor — \$300 to \$1,500
- ✓ A cover designer — \$100 to \$500
- ✓ A KDP formatter — \$50 to \$300
- ✓ A keyword researcher — \$50 to \$200

Thousands of dollars. Three to six months. For ONE book.

And Now One App Does All Of It — In Minutes

With AI Long Ebook Creator you get:

- ✓ Outline Engine — plans the structure and chapter flow
- ✓ Writing Engine — writes the full book in natural, human prose
- ✓ Cover Designer — Kindle cover plus full paperback wrap
- ✓ KDP Publish Engine — trim size, margins, gutter, TOC, front and back matter
- ✓ Export Engine — EPUB, print-ready PDF and editable DOCX
- ✓ Listing Kit — title, subtitle, description, 7 keywords and categories

==> Watch How It Works

Perfect for:

- Kindle publishers building a catalog
- Coaches and consultants who need a book for authority
- Ghostwriters charging \$500–\$5,000 per book
- Agencies and freelancers selling done-for-you publishing
- Anyone who has been "writing a book" for three years

If you have ever wanted to publish without hiring anyone...
This is the easiest way I have seen.

EMAIL SWIPE #5 (Mail AT 10PM EST)

Subject Line: Why Publishers With 30 Books Beat Authors With One
Hey,

Quick question.

Do you know why most self-published authors never make real money?

It is not talent. It is not luck.

👉 **It is VOLUME.**

One book on Amazon is a lottery ticket.
Thirty books is a business.

Here is why:

- Amazon pays up to 70% royalty on Kindle books priced \$2.99–\$9.99
- Paperbacks print on demand — no stock, no shipping, no risk
- Readers who like one of your books buy the rest
- Amazon actively promotes your other titles to your own readers
- And every title keeps selling for years

🔥 **So Why Does Almost Nobody Build A Catalog? One Reason: TIME**

To build a catalog you have to publish constantly.
And publishing constantly was impossible when one book took months and cost thousands.

That bottleneck just disappeared.

==> See AI Long Ebook Creator In Action

With AI Long Ebook Creator you can:

- ✓ Produce a finished, KDP-ready book in minutes
- ✓ Publish weekly across every profitable niche
- ✓ Sell on Kindle AND paperback from the same file set
- ✓ Build a royalty catalog that pays you while you sleep
- ✓ Or ghostwrite books for clients at \$500–\$5,000 each

While everyone else is still on chapter two...

👉 **You have already published thirty books.**
