## Abstract

Write abstract in English which is a summary of the maximum of 250 words with font Book Antiqua 9 pt

## INTRODUCTION

Manuscripts are written in English (British or US consistently) with Calisto MT 10 pt, 2 (two) columns, 1.5 space density, on A4 paper with a top-bottom margin of 3.5 cm and right-left 2 cm. The author is asked to send the manuscript in the form of a file typed in the MS-Word program using the template provided. Manuscripts that have been typed are submitted through the url link <https://journal.umnaw.ac.id/index.php/IJESH>.

The number of paragraphs is not limited, but the contents must include the background, the purpose of the research, the position of the research on previous research activities, and the novelty of the research activities carried out. A little theoretical foundation that is directly related to the content of the article can be included but does not need to be made a separate sub-chapter.

Citations are numbered consecutively in the order of appearance in the text at the end of the sentence in superscript without brackets, for example, Text<sup>1</sup>, Text<sup>2,3</sup>, and Text<sup>4-6</sup>.

## METHODS

Include large or special instrument used in research activities. This section also includes the implementation of research activities that are specifically carried out. A simple workflow does not need to be made a scheme. Common ways of working do not need to be explained in detail. Long steps in implementing activities can be made in the subsection of the stages of activities using Arabic numbering.

## RESULTS AND DISCUSSION

The results and discussion at least contain three things, namely: (1) description, (2) interpretation (explanation) of the results of research activities and (3) discussion (comparative) results compared with the results of previous research activities. If the sub-section of the results and discussion is very long, sub-sections can be made with Arabic numbering. The description of the results can be in the

form of tables and images with sequential numbers (**Tables** use **Arabic** numerical sequences and are placed at the **top**, while **Figures** use sequences of **Arabic** numerals and are placed at the **bottom**). The loaded table does not use vertical lines. The font size in the table can be reduced up to 8 pt font.

*Example:*

**Table 1.** Evaluation of method teaching before and after

Concentration of Extract (%)	Observation (cycling)	Form	Color	Odor
0	Before	Semisolid gel	White (clear)	Typical greentea
	After	Semisolid gel	White (clear)	Typical greentea
0.02	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea
0.04	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea
0.06	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea
0.08	Before	Semisolid gel	White (clear)	Typical greentea
	After	Semisolid gel	White (clear)	Typical greentea
0.1	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea
0.12	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea
0.14	Before	Semisolid gel	Rather yellow	Typical greentea
	After	Semisolid gel	Rather yellow	Typical greentea

**Figure 1.** Teaching and learning process

## CONCLUSION

Conclusions made in one paragraph without citation contain final conclusions and suggestions for further research activities.

## ACKNOWLEDGMENT

Contains information of gratitude and appreciation to parties who have participated in the research activities carried out. Can the institutions providing the budget and grants (include the sources and schemes of grants used), the institutions where the research activities are carried out, resource persons, organizations and elements of society, and academicians who have helped carry out research activities.

## REFERENCES

The references used as much as possible are the latest references published in the last **five** years (minimum **75%** of at least **15** references). The bibliography is written in chronological order with the serial number (*Vancouver System*) and is recommended to use reference management applications Mendeley Manager.
