How to Change Default Program for SVG Files:

You only need to use these directions if Inkscape does not open when you double click on a SVG file.

For a PC:
Click here (Windows 7 // Windows 10) for detailed instructions depending on what version of Windows you have, but the basic directions are:
1. Go to Start button
2. Click on Settings
3. Go to "Default Apps"
4. Click "Choose Default Apps by File Type"
5. Find .SVG under file types and select Inkscape

For a Mac:
1. Right click on a SVG file
2. Click on "Get Info (screenshot 1)
3. Expand the "Open With" Section
4. Select Inkscape from the Dropdown Menu
5. Click on "Change All"
6. When the box pops up, click on "Continue"
