### Energize Review – How do you use?

The system includes a high-ticket, evergreen product that you're pre-approved to promote.

From there, you just customize the 2 pages inside the software – step-by-step instructions included.

Finally, just follow the included free traffic methods to get visitors to these pages, then watch your list and [commissions grow](#).

[Energize Review](#) – My experience in using it and How does it work?

I used this product as a beta tester and today I'm going to make this honest review for you.

Below is the dashboard of Energize after I logged in successfully:

This is such a clean and easy-to-use interface. We have a welcome video at the center area, and a panel on the left-hand side as above.

You can always access to Tutorial section from the left-hand side of the screen as below, there're detailed training videos which will show you how to set things up step by step in just [a matter of seconds](#).

### 1/ View your campaigns

So first of all, I will walk you through all these below Done-for-you campaigns inside Energize, to show you how smart and powerful they are. You will be provided with 4 DFY campaigns, which are: [12 Minute affiliate](#), Passive income system, Super Affiliate System and The fast tracks as below. You are also allowed to create many more campaigns to promote your desired products.

For example, we will take a look at a campaign called "12 Minutes Affiliate" as above, simply click on "Publish" button and a pop-up window will appear:

There're [three pages](#) included in a campaign. They are:

Squeeze page: where you warm up your visitors' attention and motivate their want to buy product, here you can also collect lead list with a DFY form

Webinar page: the second page automatically redirects visitors to itself from the squeeze page. Here we have a webinar about the [mentioned product](#), of course the buy button is placed on this page.

Download page: the page which delivers bonuses and gifts to your customer as promised But the amazing things I want to show you are not only that, I will show you right now how a campaign does with its intelligent and optimal operation. Let's click on to view the squeeze page:

You can see this is such a stunning page, it is designed for a highest conversion and proven to help you get [high ticket commission](#).

From here, we have a sharing option with hundreds of available social platforms to spread your campaign to people. You can find it in the left right corner of my screen as above. Here we also have a signup button which helps you to collect your visitors' email and build your powerful lead:

After that, the visitor can be instant redirected to the second page – webinar page after they sign up your opt-in form.

Or this's not exciting enough to convince visitors to stay and they tend to close the current tab, then at that moment their mouse hovers to the tab-bar, they will be automatically redirected to the [webinar page immediately](#). They will also receive a “gift” notification to keep them stay when they're in the webinar page:

Let's take a look at the second page – [webinar page as below](#):

There're a webinar video here to introduce visitors to the product and its features and encourage them to click to buy. Then at the bottom of this page, we have a buy button as above which will [take the visitors](#) to the product sales page through your affiliate link.

So that's how the campaign system works. We also have the final page – download page as below:

Inside this page, there's also a button to remind the visitors about your promoted product, to encourage them back to the webinar page. And of course, it includes your bonuses and gifts that you promised to send to your visitors in the [webinar page before](#).

This bonus page link can be sent to your visitors via their emails, which is the email they enter in the opt-in form in the Squeeze page at first.

## **2/ Integration**

So to do that, Energize provides you with an integrations option, which includes many mailer services and a detailed instruction to connect to them after you click on "Connect" button under each [service as below](#):
