

HSE tours Army STEM mobile exhibit

February 15, 2020: High School North Military Club Advisor, Mrs. Danielle Stolz, invited us to tour the US Army's mobile exhibit for a demonstration of the Army's new STEM technology. The students were able to experience tactics ten years into the future, play a part in the SARAH (Search And Rescue Autonomous Hybrid) Robot Experience and enter the Critical Incident Command Post with touch screen computers. A great event on a cold winter day; thank you Mrs. Stolz for inviting our Military Support Club.
