

Creating Mastery Paths

This 90-minute session will introduce participants to Mastery Paths, an advanced module tool that allows instructors to customize learning experiences for students. Participants will explore the ways Mastery Paths can be used to differentiate assignments for required learning, optional learning, or choice assignments. Participants will also be guided through the creation of a Mastery Path module and all of the settings available to personalize content based on student performance or allow student choice in their learning experience. [Resource Guides](#) can be found in our community.

Session Topic	Topic Descriptions
What and Why (5 Minutes)	• Introductions • Agenda Review • <i>What & Why Creating Mastery Paths</i>
