

# Timber Trail Elementary

Douglas County School District Art Show

Kasey a kindergartener, used mixed media to create her fun and expressive fish. The body and fins were made from experimenting with different color paint on colored paper. Kasey chose colorful yarn to wrap her fish.

Kindergartener Lyric created this big, bright and beautiful fish using mixed media. She used brightly colored paint and dark string for a nice contrast.

Where's the Treasure Mate! Ask Lyric, she knows! Lyric, a kindergartener, created an adventurous treasure map using brown butcher paper, markers and construction paper crayons. See if you can find the hidden treasure!

This Lava Lamp is so groovy, man. First grader Ella created a 1970's style lava lamp complete with the illusion of a tie-dye background in this far-out work of art, can you dig it?

What do you think you will look like when you're 100 years old? First grader McKenna has a good idea. After examining the things that happen when we age, McKenna used an iPad app to see what she might look like when she gets older. Using that as a guide, she drew this adorable portrait of her older self.

Do you know what a zentangle is? Maya, a second does! Zentangles are a relaxing and fun way to create beautiful images by drawing structured patterns. Maya created a nicely organized zentangle drawing using pen and ink. She did a great job of breaking up the space and creating both dark and light areas.

What's on your iPod? Second grader Holden drew a tiger listening to his favorite on an iPod. He used creative colors to create this fun tiger who is tangled up in his iPod wire. If you are wondering what this dancing Tiger is listening to on his iPod, just scan the code below.

Alex used markers to draw this beautiful zentangle pattern drawing. She used a variety of patterns and shapes to create a balanced composition.

Mackenzie, a third grader, created this winter wonderland using the traditional printmaking techniques with white ink on black paper. She hand drew each snowflake in the border. Notice how they are all different.

“...The Three Little Kittens Have Lost Their Mittens...” Do you remember this fun nursery rhyme? Third grader Brandon used this as inspiration to create his very own illustration. This illustration really captures the essence of that story and communicates it’s message extremely well. Not to mention that it is an adorable illustration.

Adam, Sydney and Ella used their clay skills to create these adorable and very modern bird sculptures. They used their understanding of black and white patterns to add decorations to their adorable birds.

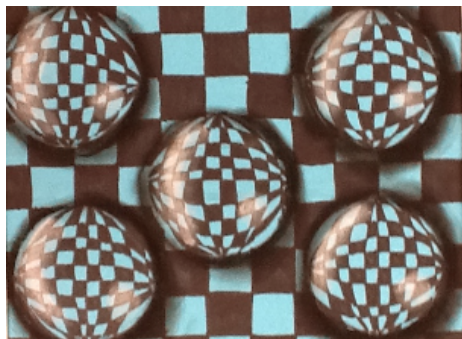

Abstract Cubism, sounds difficult - right? Not for fourth grader Sadie Rowe. She used oil pastels to create this impressive drawing using a hot and cool color scheme.

Op Art can be intimidating. Not for Seth. He took a lesson on creating a basic optical illusion and used it to demonstrate refraction by creating a magnifying glass as the reason for the illusion.

Meghan is also skilled at op art. She turned her illusion into several small water droplets, which required refracting the lines on a much smaller scale. With the added highlights and shadows, the result is a very realistic drawing of water droplets on a checkerboard.

Using acrylic paint on canvas board, fourth grader Sadie Rowe created this stunning evening painting of a tree with many curling branches. The curling branches are beautiful, and the little bat is simply adorable.

Izzy a fifth grader, used acrylic paint on canvas board to create this beautiful winter landscape. She worked very hard on the details of the trees and used soft colors to create a mood of serenity.

Have you ever used Crayon Melting as an art medium? Hannah has! This fifth grader used melted crayons to create fantastic wave drawing. She actually drew with the crayon while melting it with a heat gun in order to create this exceptional wave.

Can you guess what these beads are made from? Paper! Riley, a fifth grader, cut long triangles out of different colored paper and hand rolled each bead for this flawless necklace.

For an assignment on convex and concave clay structures, Fifth grader Troy went above and beyond when he created this adorable bird in it's nest using clay. It is very well assembled and such a sweet sculpture.

This sweet bear was carved out of stone by Tessa, a 5th grader. She used rasps and varying grades of sandpaper to get the desired shape and texture for her bear. In order to make finish in time for this art show, she worked on this bear diligently over spring break.
