

Quaal's Feather Token - Wing

(from the 1e Dungeon Master's Guide)

A token which causes miniature wings to appear on all solid objects (including living things) in a 2" radius sphere about its point of activation. These act as a *Feather Fall* spell; beings so affected cannot maneuver in the air, however, without other means (e.g. Telekinesis), but will merely fall slowly straight down. The wings will disappear from each affected object when it touches the ground or is grabbed out of mid-air by a character or creature.

XP Value: 1,000

GP Value: 6,000
