PROBLEMS OF A WARDROBE LOVER/ FASHION DESIGNER…

YES.. clothing is absolutely important.But **first** let's talk about what is clothing.Clothing is a basic necessity for all humans on earth . We clothe ourselves on a daily basis to protect ourselves from dust,dirt and a lot more!.Just like we undergo seasonal changes we humans clothe seasonally as well.We not only choose to clothe ourselves seasonally but we humans try and work to fit ourselves to the stylings of the modern world!..The world has become a lot more complicated facing competitions from various industries from all over the world.

RESEARCH SHOWS THAT FASHION MARKET IS EXPECTED TO RISE AROUND 6.7%AROUND 2023!!

Now we have seen the importance of clothing..let us look at the challenges faced by most of the people in the clothing industry.

- **RAW MATERIALS:** Being a costume designer have you ever had the dream to make a perfect outfit for yourself or others?.But the major problem you face as a designer is raw materials..YES raw materials are needed be it a cloth,net,sequence and so much more .

- **PRICING:$$** OHH! The next hustle for any human being is pricing your work.I understand that you as a person spend a lot on raw materials,rushing in here and there stitching all day!but when it comes to pricing you find it very difficult considering various factors such as time,energy,customer psychology and so much more…

- When it comes to problems of a designer there are numerous to be numbered such as *increase of utility cost ,labor force,automation,packing and the list goes on..*
