

Consultant - Solution Architect

About the role:

We are looking for a consultant with a vivid architectural and technical background. You will be a perfect fit for the position if you have experience in working as a Solution Architect, applying modern approaches and design techniques. Ideally, we would like you to have experience in designing and delivering modern solutions utilising cloud and data. Familiarity with Agile Architecture and DevOps concepts would be a great asset.

Our projects:

Short- and mid-term client projects such as:

- Enterprise and Solutions Architecture, Design and Advisory
- Leading architecture audits
- Coordinating Digital Transformation projects
- Leading various consulting projects
- Employing Cloud, Data Analytics, AI & ML, DevOps frameworks and technologies

Leadership

- Up-skill and mentoring for various roles in the area of solutions architecture
- Promoting modern ways of working and frameworks

Your daily work:

- Identification, assessment, and analysis of client's challenges and goals,
- Understanding the context of client's organization and situation in terms of business and technology,
- Providing analyses and designs within the scope of client's digital solutions and products,
- Supporting stakeholders' decisions with relevant deliverables,
- Facilitating teams to implement recommendations and making sure the change is permanent.

Must-have skills & experience:

- Broad understanding of architectural frameworks, methods and approaches
- Problem solving and analytical skills
- Awareness of IT and business trends

- Ability to draw 'big pictures'
- Detailed oriented
- Experience in client-facing projects
- Strong sense of responsibility and ownership
- Excellent communication skills with the ability to communicate with stakeholders with different roles (from junior to C-level)
- English (C1)

Nice-to-have skills & experience:

- Familiarity with state-of -the-art technologies as well as market-proven architectures and technologies (Cloud, Data, Distributed Architectures)
- Experience in IT consulting roles
- Readiness to travel when the situation allows
- Conducting workshops
- Presentation skills
