

Upper Elementary Daily Student Schedule - Remote Learning

Please note that this is an example schedule and times may vary from teacher to teacher.

We anticipate students attending a live daily morning meeting, utilizing a morning and afternoon work cycle, and attending 1 live lesson (either math or reading) a day. This means your child would have the day open to work except for the 2-3 live lessons. Please note that teachers have office hours as well and will be available to help throughout the day. All lessons will be recorded in case a child misses the lesson so that they can watch it later and catch up.

This schedule example shows a child that was placed in math group 1 and reading group 3 (grouping will happen a few weeks into school after all assessments are finished). Note I have crossed off the other live times and replaced them with work time for the child.
