

## Zotero Bibliography Issue:

Here's what I want it to look like (the annotation stays on same line as bib info), per journal instructions:

1. Cohen, D. A. (2020). New York City as ‘fortress of solitude’ after Hurricane Sandy: a relational sociology of extreme weather’s relationship to climate politics. *Environmental Politics*, 0(0), 1–21.  
<https://doi.org/10.1080/09644016.2020.1816380>.

The study describes how New York City climate change policy shifted from a “cosmopolitan” mitigation focus prior to Hurricane Sandy to a more defensive and “parochial” adaptation focus in the wake of the event. Using a relational sociological approach, the author attributes the shift to a shift in social logic that maintained the focus on economic development favored by the political elite, and bolstered by the adoption of a social justice model by grassroots advocacy organizations.

Here's what it ends up looking like in Zotero Editor (and bib output), even when I add `display="block"`:

The screenshot shows the Zotero Style Editor interface. At the top, there are tabs for 'File' and 'Edit'. Below the tabs are buttons for 'Refresh', 'Save As...', 'Page' (with a dropdown menu), 'Suppress Author', 'Cite Position' (set to 'first'), 'English (UK)', and a dropdown for 'COSUST'. The main area contains XML code:

```
<text macro="volume"/>
<text variable="page"/>
<text macro="issuance"/>
<text macro="access"/>
<text variable="note" display="block"/>
</group>
</layout>
</bibliography>
</style>
```

Below the editor, the 'Individual Citations' section shows a single citation:

1

**Single Citation (with position "first")**

1

**Bibliography**

1. Cohen, D. A. New York City as ‘fortress of solitude’ after Hurricane Sandy: a relational sociology of extreme weather’s relationship to climate politics. *Environmental Politics* 0, 1–21 (2020) The study describes how New York City climate change policy shifted from a “cosmopolitan” mitigation focus prior to Hurricane Sandy to a more defensive and “parochial” adaptation focus in the wake of the event. Using a relational sociological approach, the author attributes the shift to a shift in social logic that maintained the focus on economic development favored by the political elite, and bolstered by the adoption of a social justice model by grassroots advocacy organizations.

Here's the full code for "COSUST" style (Nature style is the base code):

```
