

RESEARCH NOTES: Sexually Transmitted Infectious Diseases

Read and analyze sources to find the following information:

What is the cause of the mental illness? Is it caused by genetic or environmental factors?	
What are the symptoms of this illness?	
How is this illness treated?	
Who is most likely to develop this mental illness? Men, Women, Children, or Elderly. Why?	

<p>How can this mental illness be prevented? What are some preventative measures that can be taken?</p>	
<p>Is the mental illness curable or fatal? If curable, how long will convalescence take? If not, how long will this mental illness take to be fatal?</p>	
<p>Identify at least two local places which can provide aid for people with this mental illness.</p>	
<p>Optional: Is there any additional information you found about this disease that you want to share?</p>
