

MAXIMIZING THE USE OF SEESAW

Activity: Implement Seesaw in the classroom as a tool for digital student portfolios, create and assign activities, family communication, assessing student progress and blog platform.

Grade Level/Courses: Seesaw has been created as a platform to demonstrate and share student learning K-12.

Check out the [Seesaw website](#) to find more information, browse from their [Library](#), participate in [Professional Development](#) opportunities or receive help from their [Help Center](#).

Steps for Successful Implementation:

1. **Visit Seesaw Website** – I would recommend to start by taking a look at the Seesaw site to learn more about its features, the way you could use it in your classroom and look at some tutorials and FAQs.
2. **Set it up** – If you decide to try to implement Seesaw in your classroom, create your account and follow their guided easy step by step set up. After you have created your class site on Seesaw, paly around a little bit to discover how it works and the possibilities Seesaw can offer.
3. **Parents** – Help parents learn about Seesaw and invite them to your class so they can start seeing student's work, comment and receive notifications. Check out [Seesaw for parents!](#)
4. **Start using Seesaw** - Browse or create an activity and assign it to your students, post student work and share it with parents, publish your Newsletter on the blog and more!
