

Smart USD - The best trading bot to protect you from big market dumps and increase your portfolio steadily!

The crypto market is hard to predict and fluctuates fast. Many investors suffer from volatility in the market, losing USD value every day. For many years, they have searched for the right tool to secure and increase their capital. 4C-Trading team has finally developed the algorithm for them.

We are introducing the 4C-Trading AI Trading Bot - the famous SMART USD Bot - to help you secure your cryptocurrency portfolio in USD value. With SMART USD, you don't need to stress about big market drops like the recent one from \$10000 to \$8000 anymore. While your portfolio would have drastically decreased by just HODLING, with the SMART USD Bot you are no longer exposed to the market and even gaining while everyone else is loosing. The results of the bot have been proven for more than 15 months and have significantly outperformed a simple "buy and hold" strategy.

So what exactly does this automated trading bot do?

- trades from BTC to USDT back and forth at the right time
- protects your capital and increases USD value

- protects you from big market dumps
- executes trades on Binance via API without you breaking a sweat

What about the results?

The best thing about the SMART USD Bot is that it is a very consistent tool that brings steady gains why traders can sit back, relax, and feel safe. Here is a screenshot of the results until September 2019. Looking at the results, you can see that SMART USD by 4C-trading is one of the best-performing trading bots on Binance.

Mnd you: the results you see are compared to the HOLD strategy results.
