

Mission: Human motivators

- What is painful about your personal current state?

I personally don't have any painful state but at some point i think that we are forced to study which is of no use and we'll not help in making money and i have no option as schooling is compulsory in our country.

- What is desirable about your personal dream state?

Being a young aged boy I simply have the advantage to be here in the TRW and working on myself to eventually make me qualified enough to earn.

I have strict diet and workout routine which will eventually put me in the top % of population on basis of health and physique which i think quite desirable.
