Group Presentation Assignment Description

Directions: In this assignment you will work with a group of no more than three members to improve a particular aspect of society. You will create a visual component to go along with an oral presentation that will take between 8 and 12 minutes.

Your presentation should include...

1. An introduction to the aspect of society that needs change for the better.
2. Information and statistics about that aspect of society.
3. A plan to put in place that one could use to contribute to that cause.
4. Explain the impact that this will have on society and if this impact can be sustained over a long period of time.
5. Explain the importance of contributing. Why is it important to have a positive impact on the world? Should we find a way to contribute to society on a daily basis? How can this be accomplished?

Visual Component

You must include a visual component to your presentation. This could include a PowerPoint presentation, a poster, brochures (bring at least 7 copies), or even a drawing. This will help the audience in understanding the material and keeping them engaged. You may use a video (maximum 1 minute) in your presentation as well. Any media needs to be approved by Mr. Keller before the presentation to ensure its appropriate for school.

Grading Component

This assignment is mostly in preparation for your End Of Unit Common Tasks which requires you to present individually. You will be graded on organization, visuals, physical presence, voice, delivery, and time. You will be given the rubric in advance to ensure that you understand the requirements of your presentation. The same rubric will be used on your End of Unit Common Task.
