

List of recent threads in which people complain or notice problems with the league system on the Battle.net Starcraft II forums (us.battle.net only). Note that the valid complaints are sometimes in later posts instead of the Original Post. The central argument of these posters is sometimes flawed, but are included because they reference a legitimate problem at some point. Not listed in any particular order. This list is partial and may be updated.

14. <http://us.battle.net/sc2/en/forum/topic/6146726207> (good thread complaining about bronze league. Excalibur's point is correct, but he misses the point about there being too many unfair matchups to begin with, which contributes to the grinding problem. Beating opponents worse than you frustrates them but does little to help you be promoted. This thread started before the season, but grinding has only exacerbated the problem. The bronze league problem could be solved by lowering sigma for matchmaking purposes, increasing search times but allowing fairer games.)
