

CSS Inquiry Book Study - Guest Post Sign Up

Thanks to all those who have signed up to participate in our Inquiry Book study - and a special thank you to those who have come forth willing to write a guest post.

Due to the overwhelming interest in writing posts, we've changed the structure a little bit.

Instead of only three openings for guest posts, we'll now have six! We'll also tackle the book one chapter at a time, per week, rather than two chapters over two weeks - which was the original plan.

The only exception is we'll skip February 15th - since that is the night of the free webinar being offered by David Perkins! Hopefully we'll all join in!

If interested in writing a guest post, please add your name to the table below - first come, first serve!

Intro and chapter one (Feb 8)	Neil Stephenson
Chapter two (Feb 22)	Yvonne Denomy
Chapter three (March 1)	Allison Hone
Chapter four (March 8)	Mark Gillingham
Chapter five (March 15)	Sarah MacGregor
Chapter six (March 22)	Joanna Sanders Bobiash
Chapter seven (March 29)	Keith Hadden

The expectations for the guest poster are:

1. Email your post to me (neil.s@calgaryscienceschool.com) ONE WEEK before it goes live. (example: chapter two is due Feb 15). Your post should also have an accompanying image.
2. I'll give it a quick read and edit - and send it back - a few days later.
3. We'll have it finalized a couple days before it goes live.
4. I'll upload the post on the dates in the table - and then anyone else can comment and

continue the dialogue.

Suggestions for blog posts:

- Think of ways/questions/wonderings that will get discussion started. Remember, we've read the same chapter, so focus on something you're interested in that will spark discussion.
- It would be great to get the discussion out of the theory and into classroom practice. Since the book is focused on 7 principles, it would be great to think of illustrative classroom examples, or ideas for how they might be lived out.

This is going to be fun!
