

Theme-plan of practical studies for IV course students of stomatological faculty on 2021-2022 study year

Day	№	Theme of the study	Duration
I	1	Sensation. Classification of sensation. Kinds and types of sensation disorders. Syndromes of sensation disorders of face and oral cavity. Methods of sensory function examination.	1
	2	Reflex-motor function of nervous system. Unconditional, pathological reflexes. Types of paralyses. Syndromes of face and oral cavity movement disorders. Methods of reflex-motor system examination.	2
	3	Pathology of extrapyramidal system and cerebellum. Methods of extrapyramidal system and cerebellum functions examination.	2
II	4	Pathology of I, II, III, IV, VI cranial nerves (CN). Vegetative innervation of eye. Methods of examination.	2,5
	5	Pathology of V, VII, VIII, IX, X, XI, XII CN. Bulbar and pseudo-bulbar syndrome. Taste analyzer. Methods of examination. Neuralgia of glossopharyngeal nerve. Neuropathy of facial and hypoglossal nerves.	2,5
III	6	Pathology of higher cerebral functions. Disorders of speaking, gnosis, praxis.	1
	7	Meningitis. Encephalitis. Neuroborreliosis. Emergency.	2
IV	8	Prosopalgias of different genesis (neuropathy, muscular, vessel, somatic, psychogenic).	2
	9	Neurostomatological diseases, caused by trigeminal system damage.	2
V	10	Cerebrovascular diseases. Transient disorders of cerebri blood supply. Stroke. Haemorrhage. Emergency.	2
	11	Closed craniocerebral trauma. Emergency. Epilepsy. Epileptic status. Emergency.	1
	12	Final module control	2

Start of studies at 9.00 , finishing №1-2 - at 13.40, study №3 — 11.40, study №4 – 12.40
study №5 - at 11.40.

Was reapproved by methodical council of department of neurology 30.08.2021 year.

Chief of department of neurology,
professor

L.I.Sokolova
