

The tentative plan is to cover the following use cases,

1. School set up and configurations (15 mins)

Manage system users ****

province, logo, etc - kept in configurations but no UIs

2. Admin features (2 hours)

- Student CRUD
- Staff CRUD
- Parent CRUD (?)
- Student parent relationship management (?)
- Class CRUD
- Subject CRUD
- Class student relationship management
- Class teacher management
- class subject management
- student subject management
- Terms management
- Promote students (better done after confirming marks management from teacher side)
- Manage school wide student notification
- Generate term reports
- manage clubs and societies
- manage teacher club relationship
- Time table management (?)

2. Teacher experience (30 mins)

- manage subject social page
- manage club social page
- update student marks
- update student notes
- generate class ranks, subject ranks.
- manage student extra curricula achievements.

3. Student experience (30 mins)

- share on club or subject social page
- view school wide notification
- personal online reports
- manage profile (pic) (?)
- personalized home page

4. Parent experience (?) (15 mins)

- View children's reports, achievements.

These are the things that came to my mind. Will add/remove based on feedback. This just a

framework to get the ball rolling!

5. Alumni portal
