ABSTRACT

The abstract is a summary of the article. It consists of research objective, research methods, the principal results and major conclusions. Implications or recommendation can be added in the abstract. The abstract must be written in one paragraph in English (the Indonesian version is written separately below the English abstract). The length of the abstract is less than 250 words. The abstract must not contain lengthy background information and have no reference to figure, table, equation, any bibliographical reference either coming within or other article. The language of abstract must be clear and concise. It is a stand-alone summary in one paragraph. Immediately after the abstract, provide a maximum of 6 keywords, avoiding general and plural terms and multiple concepts (avoid, for example, "and", "of"). These keywords will be used for indexing purposes. It is written in 10 pt Calibri, single space.

INTRODUCTION (HEADING 1 STYLE)

The section uses 11 pt, Calibri font type, single space. The length of the article is approximately 5-7 pages including all pictures, tables, references, etc. **(Normal Style)**

The introduction consists of the background of the study explaining the actual phenomenon that has been investigated, supported by references and previous studies. The author must also explain the state of the art compared to those of the previous studies. The introduction is the section where you point out the gap in knowledge that the rest of the paper will fill.

The introduction contains the problem(s) becoming the focus of the study, the purpose(s) of the study, the significance(s) of the research, and theories used to solve the problem(s). All sources that are cited or paraphrased should be written in the references list.

Follow this example: (Jones, 2021; Jones & Smith, 2021; Jones, Smith, & Williams, 2021). If you quote one or more sentences, write it this way “put a comma in front of the end quotation mark like this,” (Jones, 2021, p. 13).

Quotation that consists of more than three lines uses Calibri font type, 11 pt, single space. Quotation in languages other than English is written in *italic* and should be provided with the translation. (Jones, 2021, p.77) **(Quote Style)**

Use the most current references/theories in your article. A few of classic references are welcome; however, **80% of references should be taken from the last ten year studies.**

Use subheadings to separate different methodologies.

CONCLUSION (HEADING 1 STYLE)

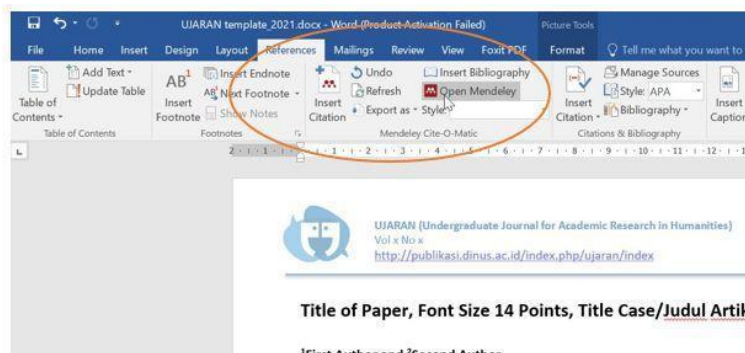

The section uses 11 pt, Calibri font type, single space. (**Normal Style**)

Conclusion provides closure for the reader while reminding the reader of the contents and importance of the paper. It can be done by stepping back from the specifics in order to view the bigger picture of the document. In other words, it reminds the reader of the main argument. Conclusion simply and concisely restates the main ideas and arguments, pulling everything together to help clarify the thesis of the paper. A conclusion does not introduce new ideas; instead, it should clarify the intent and importance of the paper.

This section may also contain suggestion. You may address unanswered aspects of your research problem, address limitations of your research, construct the same research in a new context, location and/or culture, or re-assess and expand theory, framework or model you have addressed in your research. Future studies can address the effects of specific event, emergence of a new theory or evidence and/or other recent phenomenon on your research problem.

REFERENCES (HEADING 1 STYLE)

The references must be written in APA style and use reference manager softwares such as Mendeley, Zotero, etc.
