

## The installation process to setup Firestick Lottery Display

### Part 1: Install Application

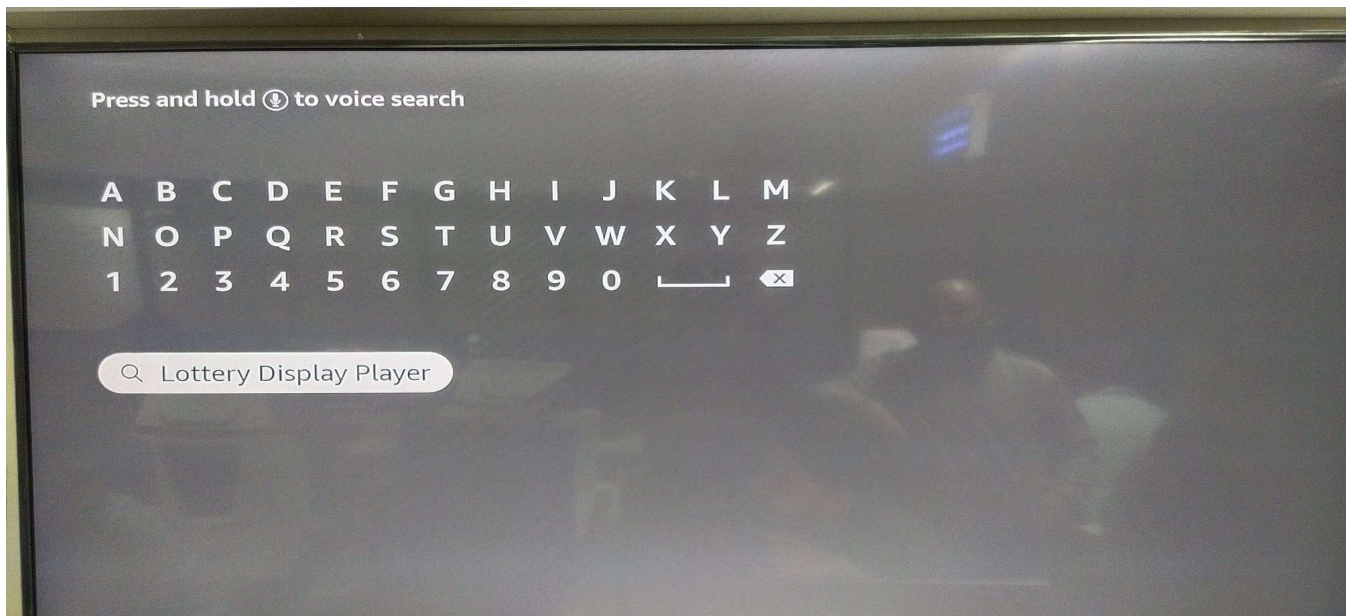

#### **Step 1:**

To begin, go to the amazon app store.

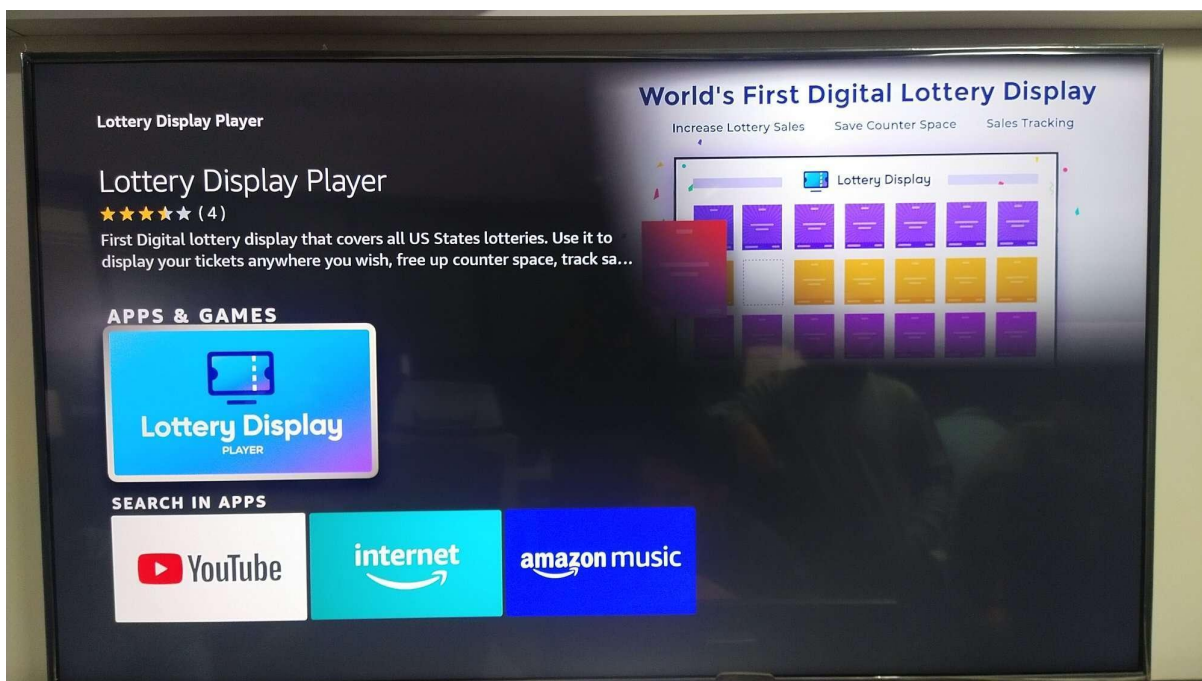

#### **Step 2:**

Search for the lottery display player.

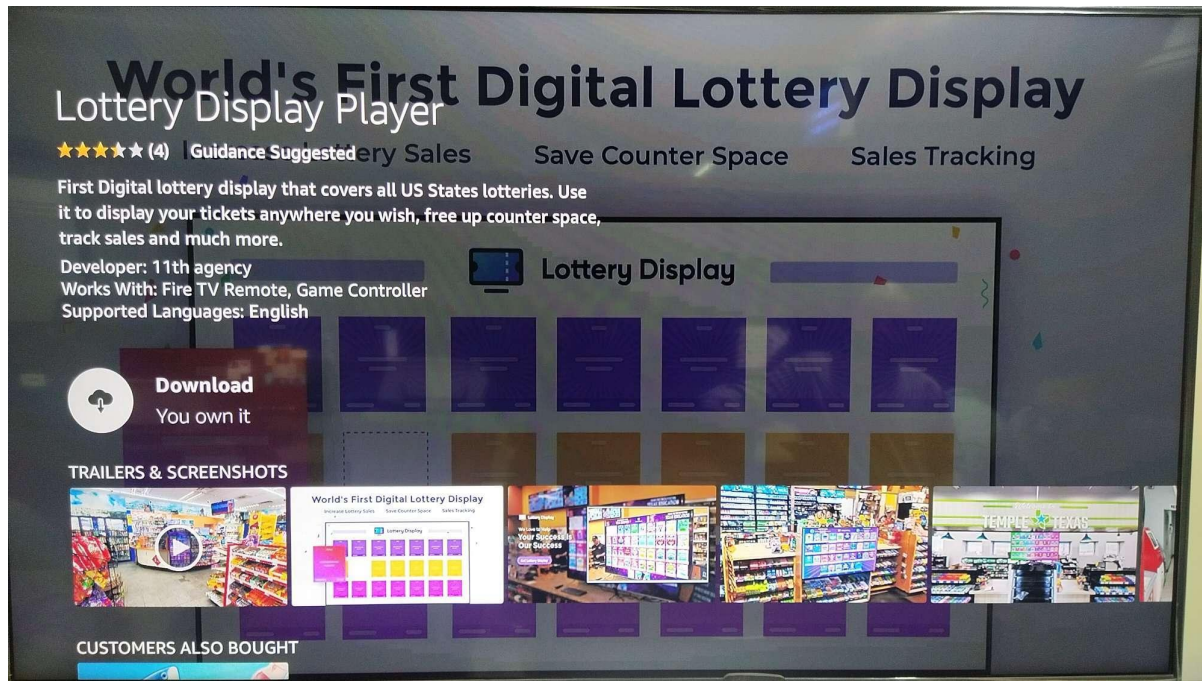

### Step 3:

Select the lottery display player.

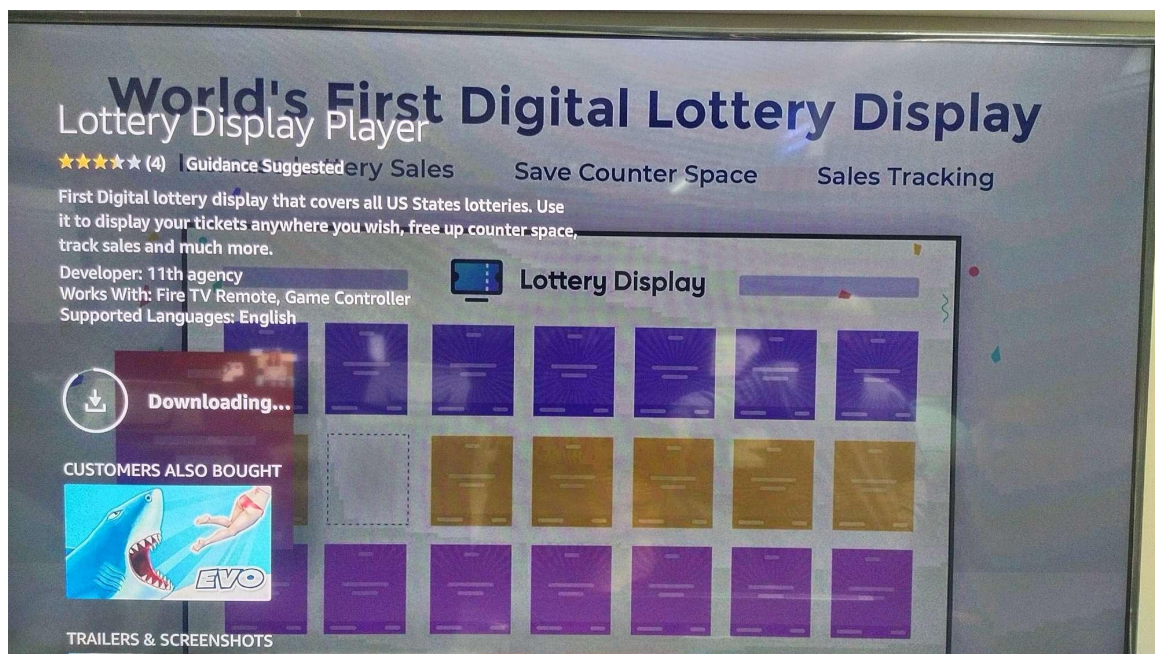

#### Step 4:

Now click on the download button and it will begin to download.

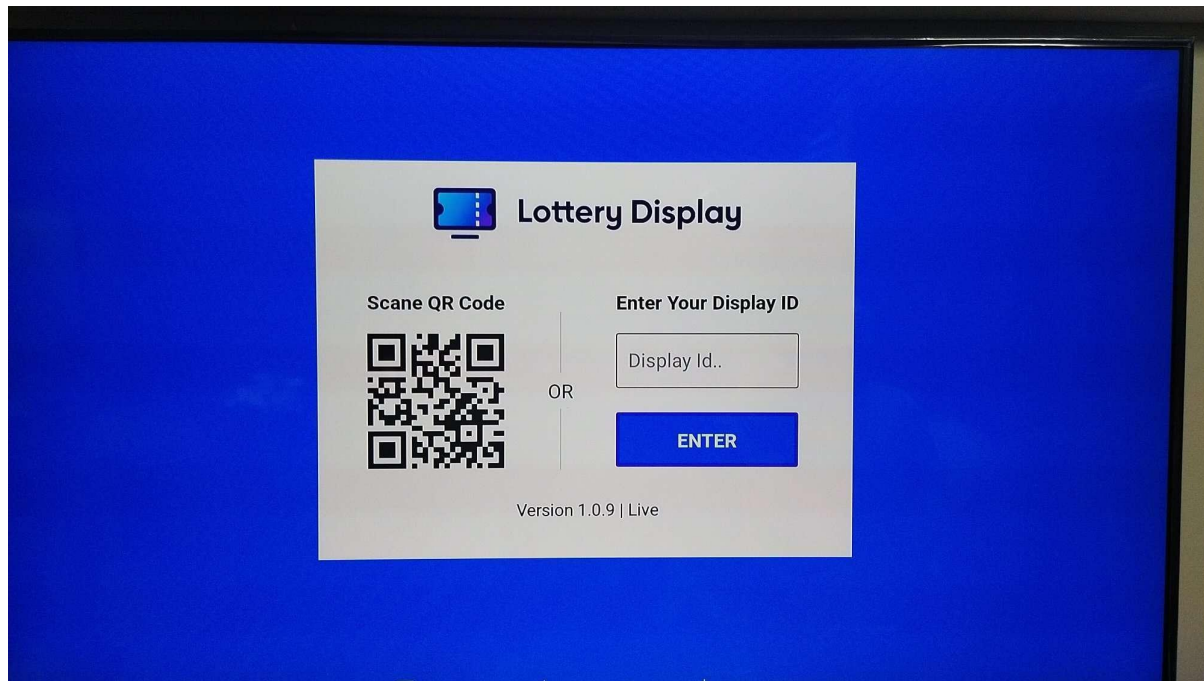

#### Step 5:

Wait for a few minutes and then open the app.

**Step 6:**

You only need to put the display ID or scan the barcode from your mobile.

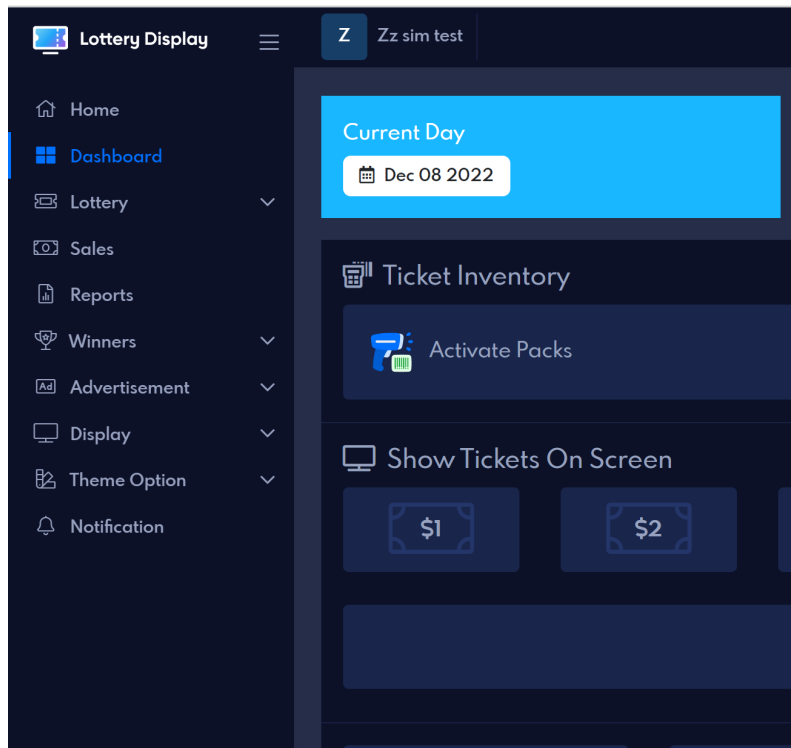

## **Part 2:**

### **Steps for Activating Tickets**

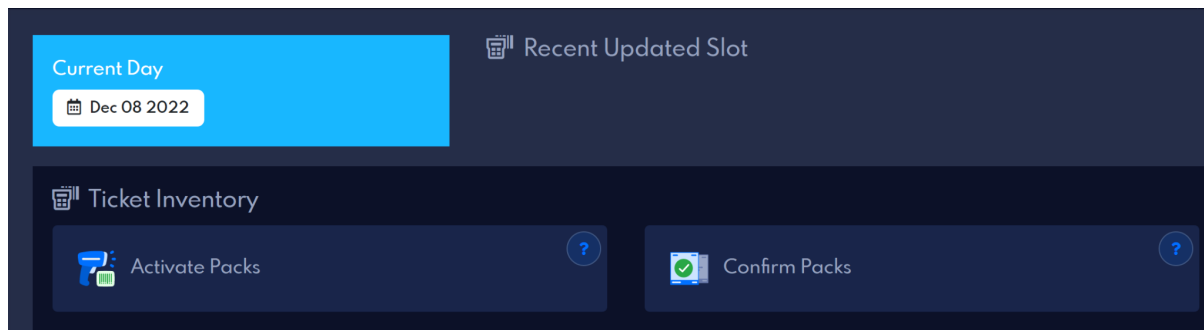

#### **Step 1:**

Login into the lottery screen app from the back office computer and click on the dashboard.

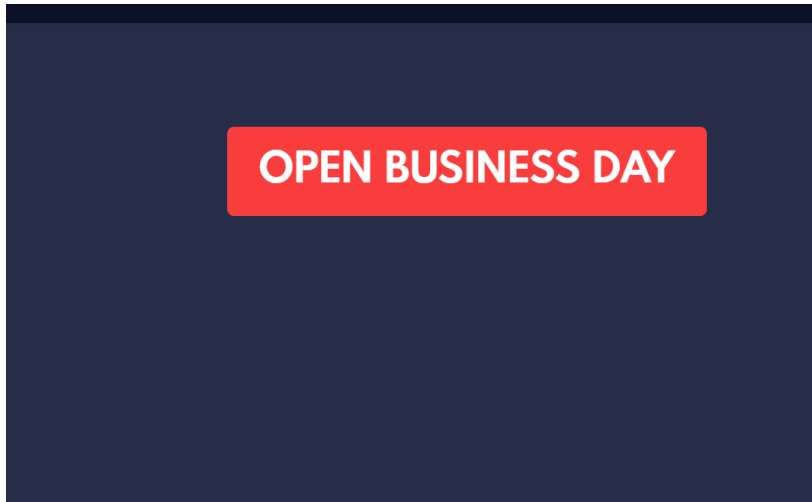

#### **Step 2:**

Click on the current day

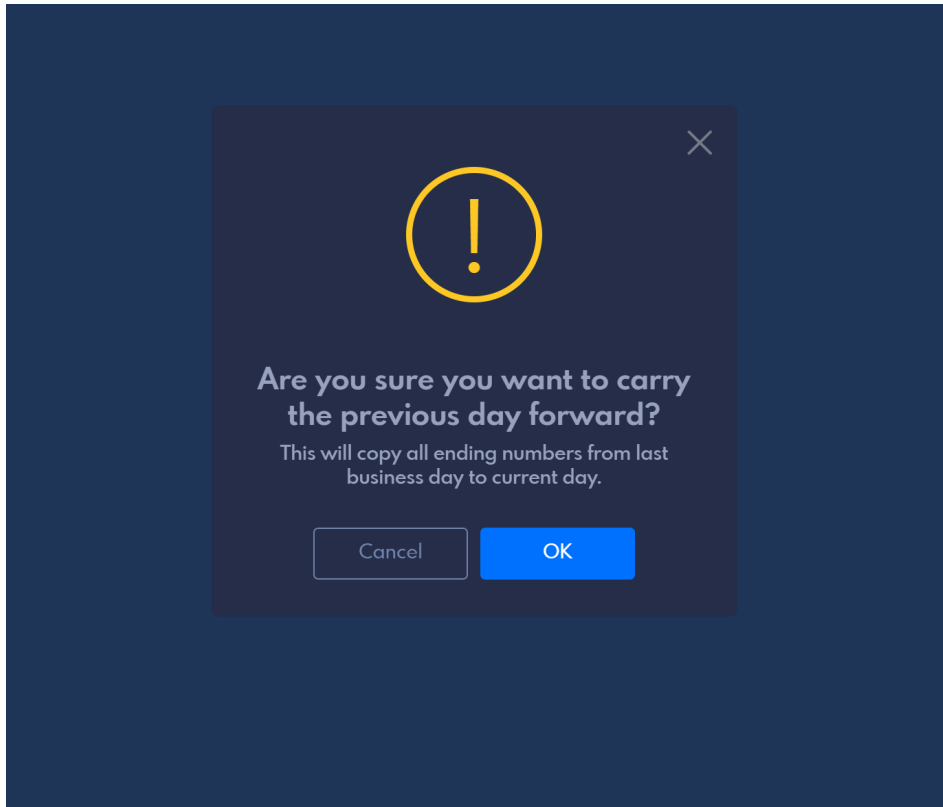

### Step 3:

After clicking on the current day, you will see the option of the open business day. Click on it.

### Step 4:

A notification for confirmation will pop up on the screen, press ok to proceed.

### Step 5:

You will see the button of **bulk active** in the middle. Click on it.

The screenshot shows a dark-themed interface for managing game sales. At the top, there's a 'Back to calendar' button and a 'Sales Date' section displaying 'Thursday, Dec 08, 2022'. Below this is a search bar with a 'Scan Multiple Games' button on the left and an 'Add' button on the right. The search bar contains four input fields: 'Scan Code', 'Game #', 'Pack #', and 'End #', separated by an 'or' and a plus icon. At the bottom, there's a row of action buttons: 'Activate' (green), 'De-Active' (red), 'Bulk Active' (blue), 'Delete Further Sales' (blue), and an 'Action' dropdown menu.

### Step 6:

Insert the number in the starting slot and the ending slot.

Suppose you want to display 63 slots on your screen, so enter number 1 in the starting slot and 63 in the ending slot.

The screenshot shows a modal dialog box titled 'Activate Multiple Games'. It has a close button (X) in the top right corner. Inside the dialog, there's a message: 'Activate packs to display and sell, All packs must be confirmed first before activation.' followed by an 'Activate' button. Below this, there are two input fields: 'Start Slot #' and 'End Slot #'. A 'Manual' tab is selected, showing a text input area with the number '1' entered. A 'Scanner' tab is also visible. At the bottom of the dialog, there are 'Close' and 'Activate' buttons.

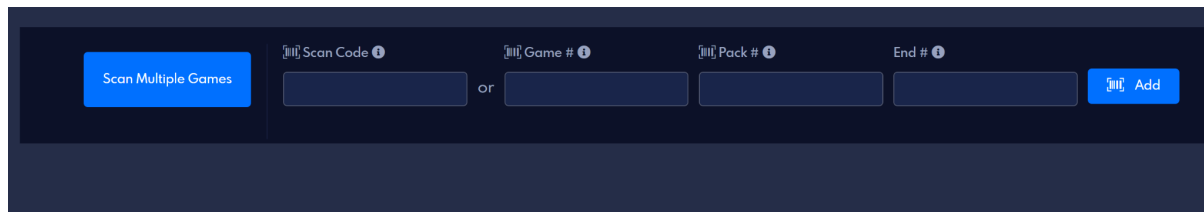

Now click inside the manual box to scan all tickets with the wireless scanner.

Note: If you are missing any barcode for any slot, for example, slot number 2, enter 0 in that space so that later, you can easily scan the bar code for that slot and move on to the third one. Your slot sequences stay organized in that way as a result.

Copy all the barcodes, and click the activate button.

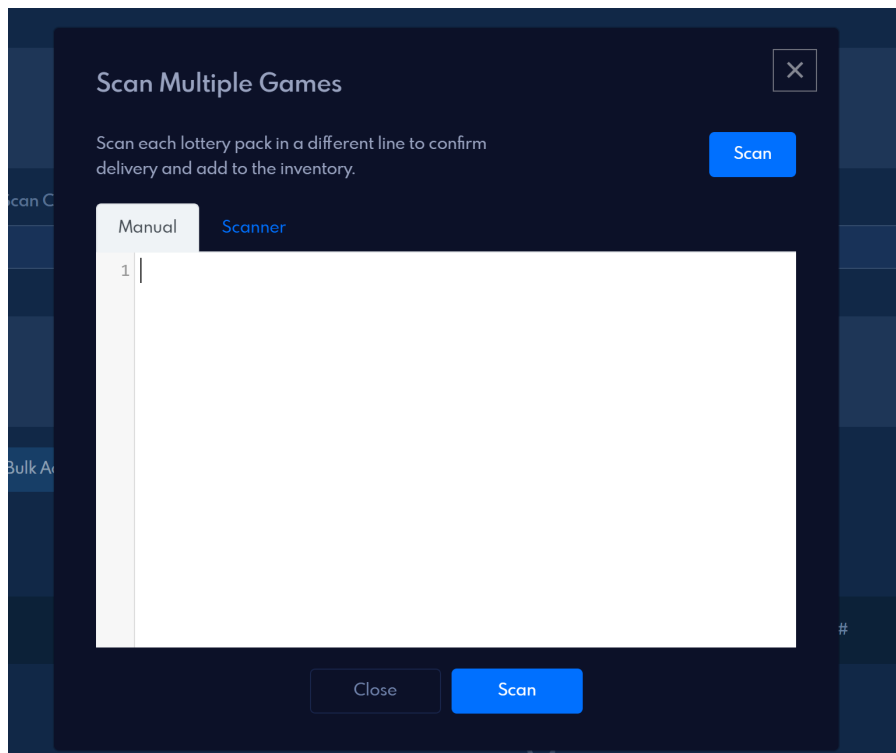

### Step 7:

Next, click the scan multiple games buttons.

A screenshot of a software interface with a dark blue background. On the left, there is a blue button labeled "Scan Multiple Games". To its right, there are four input fields with labels: "Scan Code", "Game #", "Pack #", and "End #". Each label has a small information icon to its right. Below the "Scan Code" label is an input box, followed by the word "or", then another input box under the "Game #" label. To the right of these are two more input boxes under the "Pack #" and "End #" labels. On the far right, there is a blue button labeled "Add".

### Step 8:

Paste all the barcodes that you copied, and click the scan button.

A screenshot of a "Scan Multiple Games" dialog box. The dialog has a title bar with a close button (X). Below the title, there is a text instruction: "Scan each lottery pack in a different line to confirm delivery and add to the inventory." To the right of this text is a blue "Scan" button. Below the instruction, there are two tabs: "Manual" (which is selected and highlighted in light blue) and "Scanner" (in blue text). Under the "Manual" tab, there is a large white text area. The first line of this area contains the number "1" followed by a vertical cursor. At the bottom of the dialog, there are two buttons: "Close" and "Scan".

Now grab the wireless keyboard and go to the front of the big tv. On the desktop, you will see a display app.

Click on it and enter your credentials to log in.

Now open the display setting tab on the left sidebar. Then click on display screen 1. With a single click, your tickets will appear on the screen, and you can use our software.16042264890113
