Please do not place or cite tables and figures in the abstract either.

1. FIRST LEVEL HEADING (HEAD 1)

The body text starts with a standard first-level heading like INTRODUCTION or any other heading suitable to the content and context. Copy the content and replace it for other first-level headings in remaining text. Cite references using APA style ([Reference example](#)). Headings should always be followed by text

Heading (Head 1) requirements (All caps & bold):

1. Introduction
2. Research methods,
3. Results and discussions,
4. Conclusion
5. References

1.1. Second Level Heading (Head 2)

First, confirm that you have the correct template for your paper size. This template has been tailored for output on the A4 paper size.

In this template, the “Styles” menu should be used to format your text if needed. Highlight the text you want to designate with a certain style, and then select the appropriate name on the Style menu. The style will adjust your fonts and line spacing. Use italics for emphasis; do not underline. To insert images in Word, position the cursor at the insertion point and either use Insert | Picture | From File or copy the image to the Windows clipboard.

1.1.1. Third Level Heading (Head 3)

Headings may be numbered or unnumbered (“1 Introduction” and “1.2 Numbered level 2 head”), with no ending punctuation. As demonstrated in this document, the initial paragraph after a heading is not indented.

1.1.1.2. Fourth Level Heading

This is a fourth level heading. You can replicate it where suitable.

2. STYLE PALETTE

Styles can be applied using the style palette available within the template. To activate it the press Ctrl+Shift+s. Apply the style as required based on the content and context. (Please don't highlight your text in yellow.)

3. MATH AND EQUATIONS

Scalar *variables* and *physical constants* should be italicized, and a bold (non-italics) font should be used for **vectors** and **matrices**. Do not italicize subscripts unless they are variables. Equations should be either display (with a number in parentheses) or inline. Use the built-in Equation Editor or MathType to insert complex equations.

Display equations should be flush left and numbered consecutively, with equation numbers in parentheses and flush right. First, use the equation editor to create the equation. Then, select the equation, and set the "Equation" Style. Press the tab key and type the equation number in parentheses.

$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

$$\frac{n!}{r!(n-r)!} \quad (2)$$

Be sure the symbols in your equation have been defined before the equation appears or immediately following. Please refer to "Equation (1)," not "Eq. (1)" or "equation (1)."

4. FIGURES AND TABLES

Figures and tables should be placed either at the top or bottom of the page and close to the text referring to them if possible.

Figure 1 Caption content. The title "Figure" and the label should be in **bold**.

For small tables, please place it within a column and bigger table be placed in a text frame spanning to both columns. Use the Table facility available within the MSWord. The font in the row header should be bold and you can use the style available from the style palette.
