SUMMARY

I'm a Software engineer and an avid reader, experienced in leveraging agile frameworks to provide a robust synopsis for high-level overviews. I aim to create iterative processes to foster collaborative thinking. Furthermore, I am eager to learn and deliver at a fast pace.

SKILLS

Front-End: React, Redux, Nextjs, Flutter

Back-End: NodeJS, NestJs, Ruby on Rails

Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, TDD

Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Potlock

May 2023 - Present

A retro-active public good funding platform

- Built with: Rust, Nextjs
- Source-code: [Repo](#)
- Live: [URL](#)

WORKING EXPERIENCE

POTLOCK

Co-founder

Remote

May 2023 - Present

MICROVERSE

Mentor (Volunteer)

Remote

Jan 2022 – May 2022

- Mentored 2 junior web developers, and provided technical support through code reviews.
- Successfully proposed and implemented improvements to code organization which resulted in a 20% improvement in code quality.
- Provided advice and tips on maintaining motivation to 2 trainees, resulting in a 100% retention rate within the program.

ANDELA

Technical Team Lead

Remote

June 2021 – August 2021

- Mentored 13 junior web developers, providing technical support through code reviews.
- Facilitate the daily SCRUM processes of trainees of 13 trainees with 100% adherence to deadlines
- Proposed and implemented improvements to code organization which resulted in a 15% improvement in code quality and overall performance.
- Provided advice and tips on maintaining motivation to 2 trainees, resulting in a 100% retention rate within the program.

Software Engineer

August 2020 – August 2021

- Tracking sprint velocity and team productivity to measure the efficiency of the agile development process
- Monitoring code coverage and test coverage to ensure that all features are thoroughly tested
- Measuring user engagement and satisfaction through metrics such as click-through rates and conversion rates
- Keeping track of system performance metrics such as response time, memory usage, and CPU utilization to ensure the stability and scalability of the software.
- Tracking the number of bugs and defects found during testing to measure the quality of the code and identify areas for improvement.

Romalice Consulting Group

Software Engineer

Remote

March 2021 – August 2021

- Built a whole logistic infrastructure of a Medical system in-house and reduced delivery time by 40%.
- Designed an App to manage Real-estate properties.
- Re-designed existing API from old infrastructure to new technologies to optimize performance.

EDUCATION

MICROVERSE

Jan 2022 – Present

Remote Full-stack Web Development Program, Full-Time

- Spent 8+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with JavaScript, React/Redux, and Ruby on Rails.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

AUCA

Jun 2019 – Present

Bachelor, Software Engineering

- Focused on Project Management.
- Led the Google Developer Circle which developed more than 100 workshops a year through DevJunctions.
