

November 5th

I couldn't think of a better group to try out my idea for a more interactive Maker training. I want questions, feedback and ideas from this group. I also need to get the timing down.

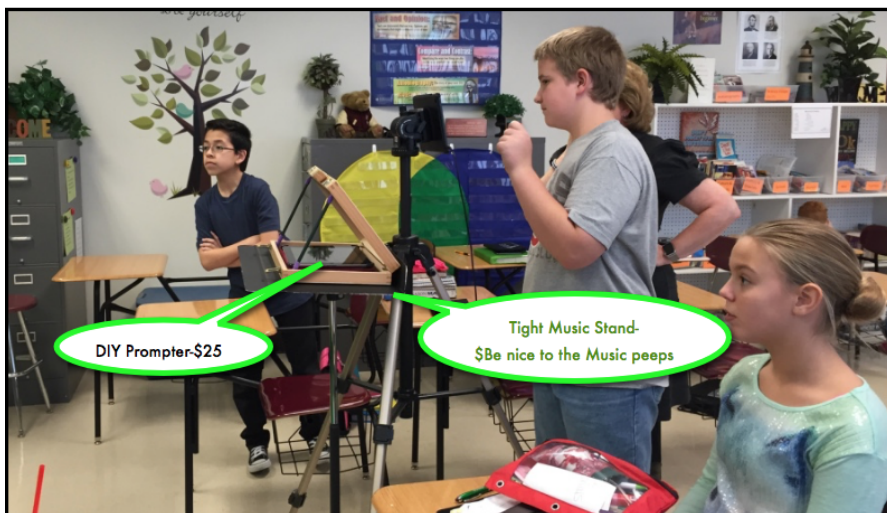

Here's the #maker workshop scenario:

1. Group that wants to participate is broken up into teams of 4-6
2. Each will build a teleprompter and install app code
3. Practice a provided script (all the way up to here can probably be done as a lunch time-might be kinda fun)
4. film it-(I'll bring a couple green screens so it goes fast)
5. Green Screen-Doink produce it (They'll give me codes)
6. Share

Now for an offer!

If you'd like to make your very own teleprompter I will bring the materials with me and you can pay me there-\$25 for the Prompter materials only or \$40 for Prompter materials, Mic extension, and pill mic.

Cash appreciated-but will take school check (I don't P.O.)

Mini Microphone for iOS and Smartphones-\$3-5
The 3 Rings on both the extension and Mic are CRITICAL!

Just Fill out this form if you are interested by: Sunday, November 1. That way I have time to get the glass cut and materials here by Wednesday.

[DIY Prompter and Mic Order Form](#)

Let me know if you have questions-Lisa Pospishil
