Introduction

Hello! There's all the important information you need to know before asking for a commission from me! I hope I've put in this document all the things you could've needed to know but if there is something I missed - please, ask me yourself! If you want to ask me for a commission or get more details - you can message me on discord (***boruburo*** or you can *find me through my own server*, link to which I have in bio and my linktree - linktr.ee/boruburo)

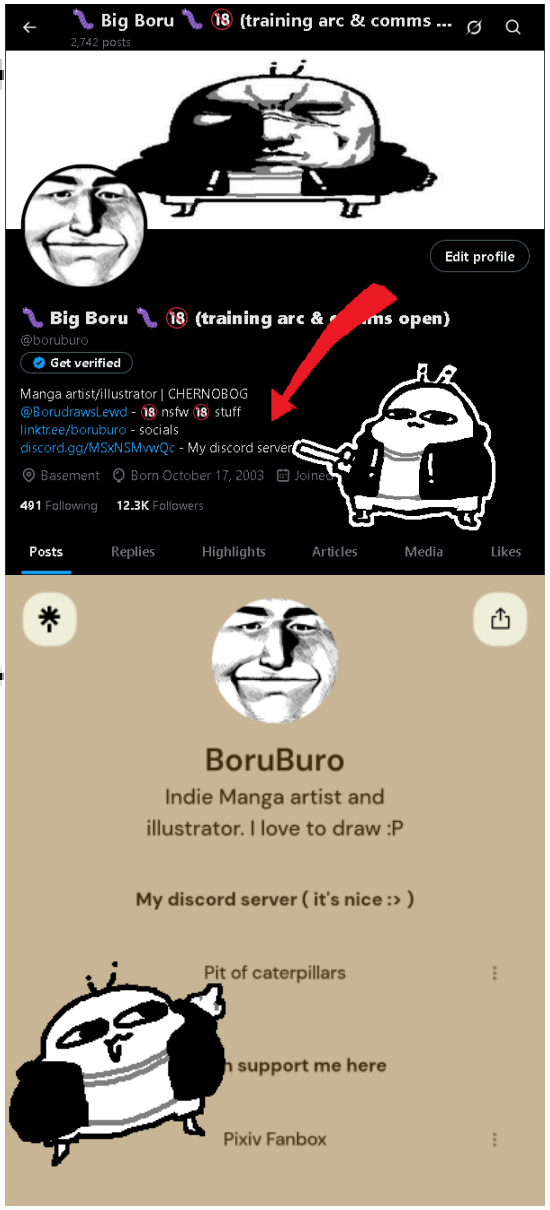

Starting point

To make a request you message on Discord

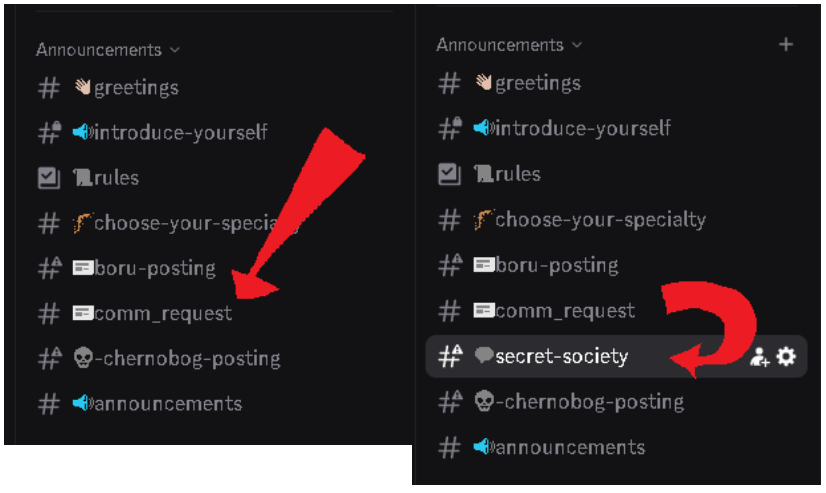

(please do not message me through twitter dms because they don't work properly and I don't check them as often) with description of what you want and the important information and references for clarification so both of us would know exactly what needs to be done and how. The less information I have - the longer it'll take for me to finish the commission and more potential corrections would be needed, since I can't guess perfectly.

Also - the commissioned arts are partially my intellectual property too so ***I'll not do the work with you if you intend on using it in any AI-model training or it being connected to the AI in the future in any other way, shape or form***.

You also can reach out to me or the mod team on my server that could tell me through the server channel (#comm_request) where you write "*I want to request a commission*" and that's all, after it my mods or I will add a role to you that will open a commission update channel.

Link to my discord server on Linktree

Pricing

Below is the table of commission style variations with the list of things that go additionally. Base price is the cost of the drawing of one-two characters to which then you can add extra stuff.

Also - I take the 50% of the total commission price as prepayment and the other 50% I take after providing information that your request is done. Once I receive the second half - I give the archive with high resolution artwork(s) inside. I start the work right after receiving the first half of the payment.

I use paypal so please ***don't include the caption for what payment is for***, especially if it's for nsfw artwork since ***it can affect both sides of a transaction***. Also ***I do not use invoices*** so upon declaring final details of the commission and getting ready to start, I'll provide the name of my paypal account on which you will be able to send the payment.

If you want your commission being private (not posted on my twitter account in low resolution) - ***please tell***.

Style	Sketch	Painting	Description
Base	**50$**	**200-500$**	Sketch - clean draft of the drawing that needs all the important details but in a simple form (you know what sketch is, I'm not trying to keep formal talk) Painting - I'll fully render your character in color with shadows, light and everything it would have if it was on full on painting. Price can depend on the complexity of the character(s).
Background	**+50~100$**		Background has no strict price but at least there's a minimum and it depends on complexity. It can be bigger and lower than that. For example if you want only one specific thing with character (for example a car) then it'll be 50 or less. If you want a whole detailed background like a city or something, then it'll be 100 or more. Details discussed personally.
Additional characters	**+50$**		I don't charge more for more than one character, until it's more than two. After that any additional character will cost extra. But please have some respect, I'll not draw two super complex characters doing anything the same as complex for the price of one, otherwise they'll cost separate TwT.
Character design	**+100~200$**		If you want to create a design for your character then please provide as much information as possible. Depends on how complex the design you want to have but most importantly - how much intellectual work I have to do for it. It'll cost less if you already have all the things in mind and only want me to give it a form.

Corrections	**25-30% of the total commission price**	I don't charge for small corrections of the work but I'll charge the estimated price on the third big correction, that'll take my time to redraw/rerender. If you'll ask for completely different thing once I already started and made a good portion of the work - you'll have to pay as like for a completely new artwork. So please, fully think it through and send as much info about what exactly you want as possible! It'll speed up the process and also make it easier for me. Will not charge for corrections in character design creation. Although, if you'll ask for character design and then ask another different one - the first will count as a separate sketch commission.

NSFW and SFW

I can do both nsfw and sfw artworks. I'll not do art of real people, no matter if it's someone close to you or especially if it's someone famous, *unless I get a clear declaration of their consent of being portrayed in the sfw artwork. I'll not do nsfw with real people*.

I will not do anything political or hateful for any group of people or specific people even if you'll offer extra. No political stuff, no racism, transphobia, homophobia or anything out of that category. I do not support hate and violence against each other.

Almost all nsfw and sfw stuff with fictional characters is ok. Since fictional characters are not real - there's no strict rule against suggestive and non consensual stuff or allowed character bodytypes.

I'll not draw nsfw artworks featuring things like - ***hyper muscles*** and ***hyper anatomy***, ***scat***, ***sexualised gore***.

With all things said above - keep in mind that *I have the right to decline your request just because*.

Updates and casualties

I don't know what will happen in the future so when I know and have an ability to tell that I have problems with work or/and providing updates on the current stage of the process I'll try to tell. ***I'll provide updates minimum once a week since the day I received the prepayment and started my work, but, please, if I'm not providing updates for longer than one week or if you want to know yourself earlier or for any other reason - don't hesitate to ask in DMs or in the server commission update server.***

If you cannot reach out to me, then you can message the mod team on my server as they always keep contact with me (

). Or you'll be able to find my emergency email address on the commission update channel on my discord server that you'll be able to message me to even when I'm having troubles with connection.

For more comfort tracking the progress and queue, I'd like you to join my server so you can be added to the commission update channel where I'll post WIPs of the current commissioned works. If you do not want to be pinged, or do not want to interact with the server apart from the commission updates - just mute the server notifications. It is easier for me to track down the queue on the server because DMs sometimes get clouded and it is easier for other people to see at what stage of the progress I am currently and on which commission. I do not ping anyone specifically in the channel, so nobody knows whose commission is whose, I just provide an

update, while the details and the starting of the commissions are happening in the direct messages that you can access to me through my discord server.
