

What is painful about your personal Current State?

- That I have no source of income and if I don't get one I'll be forced to go to university even though I know that it is all bullshita and a scam
- I don't have a set of men around me that are like minded and that I am able to grow with
- Since I am an athlete and a full time student as well I don't have hours upon hours to be working on TRW and that scares me because I know that it will take not only a lot of hard work but also time which is quite scarce for me
- I am getting older and older and it is only now that I have found the right club that is really putting in the time and energy to make me into a real high level athlete that can also make a living through sports
- That even though I am quite lean, I am not big. I will do everything in my power to put on some more weight but since I train 5-8 hours a day, I also have to eat around 4000 calories which is hard to prepare even though I am able to eat that much
- If I don't change the trajectory of my life right now then I won't have a better opportunity in the future because right now my parents are basically providing for me but that won't always be the case in the future. Also as I take more and more time the middle class is getting destroyed and if I don't get some kind of financial stability then I will remain a slave of the matrix forever.

- If I don't level myself up right now while I am young then by the time I will be successful I will be a bit older and won't be able to experience the world the same way because I will have less energy
- If I don't become the best version of myself then I will never meet the woman of my life and will have to settle for a woman that I know is not my dream and will probably just make me comfortable and just lead me into this life of constant regret and depression
