Contact /u/Myriad_Angel on reddit for various translation bounties (taken from reddit sidebar)

Projects that potentially need funding:

Website design and coding - currently running on in kind donations of talent by the community

Wallet for iOS - cost of iOS dev account, etc
Update of Wallet for Android - there is a small error message that doesn't impede functions. It would be great to have a new, cleaner look that has the same design as the iOS wallet

Facebook ads - currently personally funded by admins

Reddit ads - currently personally funded by /u/myriad_angel and possibly from an earlier pool of funds for ads

Stickers and worldwide postage - currently funded for a couple of batches. Will update when need more help

For suggestions, please contact **/u/keepmyshirt** on reddit, twitter, irc/telegram/slack.

Note: Most of the contributions by the community are done in kind, i.e. If you're a coder, you code things, graphics people design things, etc. there really isn't a culture of "hey gimme cash so I'll do this for the community". It's more "what are my skills and how can I help myriad?" This list is to address those projects that will benefit from an influx of cash.
