

Group	Thesis Statement
Group 1	This paper analyzes three solutions provided by The Center for College Affordability and Productivity to solve the rising cost of tuition at U.S. universities, including offering 3-year bachelor degrees, ending the “Athletics Arms Race”, and moving more classes online. This paper will both critique these solutions and offer ways to improve them.
Group 2	This paper will critique and offer improvements of three current solutions from the center for college affordability and productivity which are offering 3-year bachelor degrees, ending the “athlete's arms race” and move more classes online, to reduce the rising cost of tuition at US universities.
Group 3	This paper will critique on 3 solutions provided by The Centre for College Affordability and Productivity to solve the problem of the rising cost on the tuition of U.S., including offering 3-year bachelor degrees, ending the "Athletics Arms Race" and moving more classes online.
Group 4	This paper will analyze and evaluate 3 solutions provided by The Center for College Affordability and Productivity to deal with the problem of the rising cost of tuition at U.S universities. This paper will critique these solutions: offering 3-year bachelor degrees, ending the “Athletics Arms Race” and moving more classes online.
Group 5	This paper will analyze and critique three solutions suggested by The Center for College Affordability and Productivity to solve the rising cost of tuition in U.S. universities, including offering 3-year bachelor degrees, ending the “Athletic Arms Race”, and having more online classes. This paper will also suggest improvements with respect to the solutions mentioned above.
