**Climate change** 

Climate change means that many countries have more flood:

of rising sea levels. Most trees and plants can't live in seawate.

comes onto farms, the salt in the water kills the crops and farmers can't grow anything for many years. So, people lose their farms and their homes.

However, in hot countries like Egypt, mangrove trees grow in the sea along the coast. Mangrove forests protect farms and communities from strong winds and storms. They provide homes for plants, fish and sea animals. If there were more mangrove trees, there would be fewer floods.

Now in Egypt, people are growing thousands of mangrove seedlings to plant along the Red Sea coast. The problems caused by rising sea levels could get worse if they didn't plant new mangrove forests. So, they are going to plant 300,000 seedlings every year. When they grow into mangrove forests, they will protect the coast from rising sea levels.

### Reading

### **The Iron Woman**

One day, a girl called Lucy was surprised to see the Iron Woman. She was enormous, with big red eyes. Lucy was frightened, but she found that the woman wanted Lucy to help her. Lucy's father worked at a factory and the Iron Woman asked her where the factory was. Pollution from the factory was killing all the fish in the river, so she wanted to destroy it.

The Iron Woman had special powers so that she was able to make all the factory workers become fish. The workers all had to live in the river and started to understand how difficult life was for the fish.

Lucy wanted to help the Iron Woman, but she was worried ab after the Iron Woman left, Lucy called a boy called Hogarth with the Iron Man.

'If you brought the Iron Man here,' said Lucy, 'we could find an answer to the problem.' The next day, Lucy met Hogarth and the Iron Man at the factory. When the Iron Woman arrived, the Iron Man told her that he had a plan. Soon, the Iron Woman let them become people again. They could stay people if they promised that the factory would not produce any more pollution. They all agreed, and the river became clean once more.

Reading (2)

What do you do to help the environment?
Have you given up anything?

We're using the air conditioning less often. In summer where the very hot, that's difficult, especially at night, but you get used to the very the very hot, that's difficult, especially at night, but you get used to the very hot, the very hot, that's difficult, especially at night, but you get used to the very hot, that's difficult, especially at night, but you get used to the very hot, that's difficult, especially at night, but you get used to the very hot, that's difficult, especially at night, but you get used to the very hot, that's difficult, especially at night, but you get used to the very hot, that's difficult, especially at night, but you get used to the very hot, and the very hot, that's difficult, especially at night, but you get used to the very hot, and the very hot where the very hot is the very hot where the very hot is the very hot where the very hot will be a very hot where the very hot where the very hot will be a very hot

#### eat Green Wall

This report is green initiative in Africa called the Great Green Wall. This is set up in 2007 by the African Union to solve the problem of ation in the Sahel region of Africa.

Des macation happens when green land becomes desert. In the Sahel region, this has happened because climate change is creating more droughts every year and people do not always farm the land well. People cannot grow food and they are losing their farms and homes.

The Great Green Wall initiative will plant millions of trees, seedlings and plants across Africa from west to east, to create a growing, green landscape. When it is finished, the wall will be 8,000 km long. It will be the biggest living thing in the world. It will create jobs for 10 million people. The trees and plants will improve the land for farming again, and people will be able to grow crops.

The Great Green Wall will improve the lives of everyone Sahel region. It will also help reduce the problems cal change for the whole world.

#### Reading (2)

There are many green initiatives across the world which are helping to protect the environment. There are projects to build solar farms to create green energy. There are projects to plant seedlings and trees to give us cleaner air. At home, people are choosing to use rechargeable batteries and energy-saving light bulbs. Some people are buying more made of bamboo which is sustainable and doesn't cause pollution. Some people are even using air conditioning less often because it uses so much energy. What can you do to help protect the environment?

1/1/200 L

A students and his professor sow a pair of	f old shoes laying in the path. If

A students and his professor sow a pair of old shoes laying in the path. It belonged to a poor man who worked in a field nearby. The student wanted to play a trick on him, but the professor refused. They agreed on putting a coin into each shoe and hide themselves to watch how that would affect the poor man. The man soon came to the place where he had put his shoes. While slipping his foot into one of his shoes, he felt the coin. The man put it into his pocket. When he proceeded to put on the other shoe, he found the other coin. His feelings overcame him and he jumped over with joy thanking God. The man spoke of his sick wife and his hungry children. The student was deeply affected and his eyes filled with tears. "Now, said the professor," isn't it much better than playing your trick? "the student said that his profess had taught him a lesson to remember.
