

**The title should be a concise sentence of no more than 14 words,
written in sentence case**

First Author * ^{1, a}, Second Author ^{2 b} (11pt)

¹ First affiliation, Address, City and Postcode, Country (9pt)

² Second affiliation, Address, City and Postcode, Country (9pt)

^a Email First Author *; ^b Email Second Author (9pt)

* Corresponding Author

Abstract: The abstract must be written in English using 9 pt Arial font size with single spacing and a maximum length of 200 words. The content of the abstract should provide a comprehensive overview that includes a brief introduction to the problem, the purpose of the study, the research methods used, and a concise summary of the research results or findings. Additionally, the author must include 1 to 5 relevant keywords to facilitate the search for the article.

Keywords: keyword 1; keyword 2; keyword 3; keyword 4; keyword 5

INTRODUCTION (HEADING 1) (BOLD, 10 PT)

The introduction must clearly outline the issues to be discussed, supported by an adequate background and a brief literature review. The review aims to document existing solutions from previous researchers, identify the study's limitations, and highlight the scientific merit or novelty of the manuscript. In the concluding section of the introduction, the author must explain the urgency of the research and clearly state the objectives and research problems being examined.

METHODS (HEADING 1) (BOLD, 10 PT)

The Methods section is written in a descriptive manner to provide an account of the research methodology, including the type of research, approach, data sources, and analytical methods employed. Authors must explain the mechanisms used to analyze the subject or issue under discussion so that readers gain a clear understanding of the research process. This section is mandatory for field research manuscripts but **optional for articles presenting conceptual ideas**.

RESULTS AND DISCUSSION (HEADING 1) (BOLD, 10 PT)

The Results and Discussion section focuses on presenting objective findings based on data and hypothesis testing. These findings should be analyzed in depth through comparison with theory and relevant prior research. To improve readability, authors are advised to organize the discussion into subsections based on the research questions.

Regarding visual elements, all tables and images must be centered (at the top or bottom of the page) and must be referenced in the text. Technical requirements include using single spacing for tables and using high-resolution color images. Finally, ensure that tables and images are numbered sequentially according to their order of appearance.

Table 1. Font Size for The Manuscript (9pt)

No	Category	Parameters	Status
1	Law	Compliance	Good
2	Education	Effectivity	Good
3	Economy	Growth	Good

The answer to the first question (Heading 2) (bold, 10 pt)

The answer to the second question (Heading 2) (bold, 10 pt)

The answer to the three question (Heading 2) (bold, 10 pt)

CONCLUSION (HEADING 1) (BOLD, 10 PT)

This section presents the main findings of the study in a concise manner and should guide the reader to the core issues addressed in the paper.

ACKNOWLEDGMENT (HEADING 1) (BOLD, 10 PT)

(OPTIONAL) Authors may include an acknowledgments section to express gratitude for assistance from others or research funders who are not listed as authors.

REFERENCES (HEADING 1) (BOLD, 10 PT)

The reference list should include up-to-date primary sources. All citations and references must follow the APA 7th edition (American Psychological Association) style, and the use of reference management tools such as Mendeley is strongly recommended. Visit <http://www.apastyle.org/pubmanual.html> to verify the citation guidelines.
