Many people say that examinations should be abolished because they are not the best measure of student's capabilities. These people believe that students can study on their own and do better without the nagging worry and pressure exerted by examinations.

Yet, there are persuasive reasons to show that examinations should not be abolished. It is insufficient that teachers assign homework and correct it. Because this is not done under supervision, they cannot be sure that it is really the work of the students themselves. Moreover, homework is not a test of student's ability. Homework is a method of merely keeping him occupied.

Nowadays, in the hunt for jobs, students need to produce some evidence of their capabilities. Prospective employers like to see copies of examination results. This is the only way a student's qualifications can be judged. This attitude greatly encourages the use of examinations, since it is considered necessary for them to measure their capabilities.

B. Nobody trusts the students nowadays.
C. It is a regulation in the country.

D. the examination is used as means of measuring students' abilities annually before ending their education.
E. the government obliges educational practitioners conducting the examination for increasing the quality.

What do you think about home schooling? Do you think it's a good idea concerning socialization and all? Believed to be first introduced in the U.S. decades ago, home schooling is now mushrooming in the country. This phenomenon seems to be in response to the fact that children's rights are sidelined in the arena of formal education. As an alternative education system, home schooling could become a popular choice for children of school age

Home schooling provides kids with educational opportunities that traditional public schooling has not provided. It offers a refreshing system by which students are encouraged to be creative and express themselves. Students will discover the thrill and sense of accomplishment that self-initiated learning can bring.

On the other hand, some people believe that home schooling can be inefficient and expensive. Students' social life is, indeed, something to be concerned about in home schooling education. Most school districts make sincere attempts to keep their home schooled students active participants in the social, athletic, and extracurricular life of the school.

It is strongly recommended that parents contact home schooling resource that may be able to put them in touch with kids who have gone through home schooling and those who are currently being home schooled. Talking with them would be a great way for parents to make a more informed decision about their kids' education.

4. The text mainly discusses about ...
