

SL: Path To Greater Revenue

Hi Avni,

I want to say that Crytek games and VR are excellent and immersive.

I spent some time looking at your business and the strategies you used, and here are some things that based on my knowledge you could improve.

I can help you by:

- attract more gamers to your company by creating a new email newsletter to send them
- research all the markets where Crytek can make some serious money
- Create a new message that is tailored to your customers

Let me know if this is something of your interest, I look forward to hearing from you soon.

P.S. If you want to continue our little process, I will show you the solutions I've created.
