

Christian Cooperative Party Platform

We in the Christian Cooperative Party feel that America has lost its way. It has fallen to the cursed union between ultra Secularism and blasphemous Capitalism. Through this union cursed forces, both in private industry and government have moved against the poor, the needy and the dispossessed. They have waged war against immigrants, they have tried to remove the Lord from our schools and our government, they have slashed welfare and the things that the needy must have to survive, they have promoted sin of lust and greed in the people's lives and have waged war against all common good in this nation, using the forces of the market and of the secular government to stamp out the Christian common good in America.

We in the Christian Cooperative Party, reject such blatant undermining of both God and the Working people of America. We wish to steer America back onto the path of righteousness, stewarding it with a compassionate Christian Government, which accepts all races, ethnicities, religions, sexualities and sexual preferences within its loving arms. We seek to implement the just and blessed teachings of Christ our Lord and Savior into both our state and national governments, and to promote an America, of absolute tolerance, of absolute welfare, and of absolute righteousness. The Christian Cooperative Party seeks to achieve this through several ways which we will illustrate throughout this platform.

Creating an Economy where Both God and Man matters.

We in the Christian Cooperative Party, believe that to fundamentally to create a just, tolerant and Christian society, that we must first approach and handle the Economy, we believe in dismantling the current state of the economy, destroying its blasphemous and satanic routes and replacing it with an Economy where Both God and Man matter, based off of Christian teachings. We shall accomplish this monumental task through several policies.

- We believe to achieve such a Christian Economy, we have to strengthen labor unions, giving them the ability to properly represent the working class of America. To achieve this we believe in abolishing right to work laws, at will laws, repealing Taft-Hartley, ban scabbing and making Unions mandatory for Non Cooperative Enterprises and State ran industries, to further protect workers.
- We believe in handing over non essential industries to the workers, these would be organized as worker owned cooperatives and union ran shops. These would insure a healthy and happy population as they will be able to control and own the means of production, and be able to directly control their lives
- We believe to achieve economic independence for both home owners and renters, that we seek to both abolish mortgages, forgiving all mortgage loans and debt, and to abolish rent in itself, paying off the rent of the renters, and eventually appropriating the properties themselves and directly handing them over to the renters, creating housing Co-Ops.

- To further expand on previous tenants, we believe in the creation of a national housing initiative, making housing a human right and guaranteeing every individual the right to a modest home. We believe to achieve this is to expand the current housing programs, and subsidize all housing units to the point where they are in all practicality free.
- We seek to achieve the independence of the people from things like utilities, thus we believe that we need to nationalize all electric companies, plumbing, internet providers, heating and any other essential business, a unified state owned, worker ran company shall take its place and will not charge any fee for these services.
- To foster the promotion of public welfare, we seek to implement a wealth cap of five million dollars, and high tax rates upon the wealthy, all money raised from the wealth cap shall go into expanding, social security, unemployment and other welfare programs. We will also use this wealth to create a new welfare program, which will guarantee each and every American a decent living, by guaranteeing them thirty two thousand dollars a year.
- To create a Public Healthcare system, that both insures and promotes human dignity, trans rights and a happy and healthy population. We believe in a totally socialized medical system, which covers all procedures and hospital visits and doctor appointments, this would also provide coverage for gender transitioning, physical therapy and standard therapy.
- To Promote an economy for the poor, we believe in the elimination of most Sales taxes, so that the poor can thrive
- To Promote an Agrarian Economy, we believe in covering 100% of all rural utilities, and to subsidize small and local farmers and communities.
- We Believe in the establishment of a twenty three dollar Minimum wage, which will provide all Workers in this blessed Union, a wage which will sustain them

Creating a more tolerant and Christ like America.

We in the Christian Cooperative Party, believe that America socially has lost it's way, fallen to both demonic racism and fascism, fanatical secularism and atheism, and unbridled libertarian "progressivism", this has led to a nation that has lost its way. We see people indulge in sins which the free market gladly provides, we see symbols of God being torn around replaced by soulless human symbols. Finally we see rampant misogyny, racism, homophobia and transphobia, all of which oppress the needy and desperate. We in the Christian Cooperative Party believe this can not stand, and that we must make America Christ Like again, to achieve this we seek to implement the following policies

- We believe first, to tackle unkempt sin in our nation, we believe in the regulation of casinos and online gambling, such a dangerous practice, which has left people bankrupt and cause many to become addicted to the material, we believe in the implementation of a total ban on all casinos, and ban online gambling being implemented in games, this does include loot boxes.
- We Believe, that cigarettes and other tobacco products, have only brought destruction upon both Americans and the environment, thus we believe in the ban on the production and distribution of cigarettes in this country.

- We believe that the death penalty is unjust and immoral, and that it's abolition at both the state and federal level is a must have.
- We believe that Abortion is immoral in most if not all cases, thus we believe in banning abortion after 8 weeks unless in cases of rape and incest
- We believe in allowing teachers to teach Creationism in school, and promote alternatives to the theory of evolution.
- We believe that the ideologies of National Socialism, Fascism, Ethnonationalism, White Separatism and other Satanic Far Right Ideologies, only bring about harm to the average American and causes our Union to fracture, thus we believe in abolishing organizations which follow these Ideologies, along with banning their speakers and mandating websites and forums implement policies to ban these groups from allowing their hateful rhetoric to spread, along with funding organizations and groups which will assist individuals to be pulled out from these organizations
- We believe that pornography has been a detriment to the United States, and that its continued proliferation must be dealt with, thus we believe in the abolition of all pornographic production corporations and the ban the distribution of non homemade pornographic content.
- We believe that the Church is a holy institution and we oppose any and all attempts to tax it.

God and America on the Global Stage.

We believe that Christ's teachings also apply to the geopolitical arena, and thus support Christian and Compassionate policies that will both foster global friendship, while also promoting Christian values.

- We believe, that all foreign conflicts the United States has so far been involved in, besides World War Two, were unjust imperialistic conflicts. Thus we support the implementation of the just war theory, and amendments to the United States Constitution which will make it difficult for President or Congress to go to war without the people's approval.
- We support the immediate withdrawal of most military bases from overseas, and the drastic cutting of the military budget, and the reinvestment of those funds into other programs that would promote solidarity among the people.
- We believe that we must cut all arms deals to other nations, as the proliferation of war and violence is against God's word.
- We believe that we assist developing nations, through free loans of money that would assist them greatly in their progress to build up.
