CSTAG Referral Process

-Referral is made to admin through forms or directly.

-Admin determines if the threat warrants the CSTAG process.

-Admin determines who will be assigned to the interview process. This choice should be guided by the availability of team members and the apparent urgency of the threat.

-After interviews have taken place, at least one other team member needs to be present for the next steps in Navigate 360 (Filling out the Key Observations, Classification, Threat Response forms.)

-Case will automatically populate to other team members
