

Getting Started With Your SMART Panel

Follow these three steps to prepare for your first SMART Panel training. We are looking forward to your session, and these quick steps will help your training run smoothly.

1. **Check your WiFi connection.** Open **Settings** and view **Network**. Check to make sure WiFi is on and choose JCPS Wireless. You can select **view available wireless networks** to see additional WiFi options. Open the Browser and navigate to a website to check your connection.

2. **Sign into your SMART Panel.** Tap the face in the upper left hand corner and sign in using Google and your school district account. Note: Sign into your SMART account from your Chromebook or computer first. You will find Lumio in the waffle when you open Google Drive.

3. Watch the 3-minute video found [here](#) to view how to sign into your panel, turn on Google Drive Integration, and save your Whiteboards to Lumio.
