

How to automatic insert command to interactive program

Jing, mqjing@gmail.com

GitHub: [Download](#)

Step 1: 使用 child_process 的 `execFile`

```
var execfile = require('child_process').execFile;
```

Step 2: 載入 執行檔

```
// 啟動 interactive program
```

```
var child = execfile('node', ['-i'], (err, stdout, stderr) => {  
  console.log(stdout);  
});
```

```
// 自動填入指令
```

```
child.stdin.write('process.versions; \n');  
child.stdin.end();
```
