Dec 15th:
PrinceMelo(Man with High T, brave but not sorry):
Mainly riding Swings
Thesis: If failed to go above 486.64, then next Liq pool will be at 460-470 area where only major support is 468.

Scalp:
Range: 474.5-486.5
NVDA broke above 486.64, target 491,493, 495. Stop loss:485.(First and second scenario)
NVDA Break below 474.5. Short to 470(hr Trend line spot), then followed by 467,464,460. Stop loss: 475.82 or hourly 5 EMA.(Third and fourth scenario)
First scenario: Open we rip higher to 490-492 then rug pull back to range.
Second scenario: Open we retest 486.5 area and ranging
Third scenario:open we retest 486.5 then slowly grind lower then rip to 470.
Fourth scenario: gap down: up 5 mins then rip down to 470 then reversal back to open like what we did in past few days.
