ABSTRACT

This guidance is consisted of instructions and format for writing full paper for the **1st International Conference on Co-Curricular Learning Experience (ICCLE²⁰²⁴)**. The length of the manuscript is not strictly limited, but the suggested length is 4-6 pages. The abstract should contain between 100 and 350 words. A concise and factual abstract is required. The abstract should state briefly the purpose of the research, the principal results and major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. Citation or references should be avoided in the abstract. The paper should be submitted as a Microsoft Office Word (.doc/.docx) file. Paper should consist of introduction, methods, results and discussion, conclusions, references, and if available, acknowledgements.

Keywords: Minimum three keywords; Maximum five keywords; Use semicolon as separator

Received October x, 2023; Revised October xx, 2023; Accepted October xx, 2023

Doi: <https://xxxxxxx>

1. INTRODUCTION

The first sentence should start here. [Format for first heading: Use a numbering system starting with 1; All uppercase; Calibri, 10 pt, bold, align left; single line spacing]. For example: Thermogravimetric analysis (TGA) is the most common technique used for kinetic analysis of the devolatilization process, and it provides the possibility of evaluating the mass loss of a sample with temperature and time (White et al., 2011).

Second paragraph starts here (single line spacing between paragraph). [Format for body text: No indentation; Calibri, 10 pt, justified alignment; 0 pt before and 0 pt after paragraph spacing; single line spacing].

Generally, in manuscript should have 1. Introduction (research background and literature review); 2. Methodology or Materials and Methods, 3. Results and Discussion; 4. Conclusion; Acknowledgement, References. You may add more if required.

2. METHODOLOGY

You need to write at least a paragraph under the first heading before using a subsection. You can use as many subheadings as you like, but you need to number them appropriately.

2.1 Sample Preparation

[Format for second heading: Use a numbering system starting with x.1; Capitalize Each Word; Calibri, 10 pt, bold, align left; 0 pt before and 0 pt after paragraph spacing; single line spacing].

2.1.1 Sample Testing

[Format for third heading: Use a numbering system starting with x.x.1; Capitalize Each Word; Calibri, 10 pt, Italic, align left; 0 pt before and 0 pt after paragraph spacing; single line spacing].

3. RESULTS AND DISCUSSION

All tables and figures must have a corresponding caption. Table should be placed at the center. The table caption must be placed above the table and the figure caption will be placed below the figure. Try to keep your whole table on the same page. If you must split your table, must sure that you include a table heading to the second half of the table too. The word for table in the body paragraph must be bold (example: **Table 1**). All Figures must follow the standard of quality for publication. Authors must provide a high quality with high resolution Figure. Content in the Figure should be clear and readable. Each Figure must be discussed or mentioned in a body paragraph and bold (example **Figure 1**). The Figure must be placed under the paragraph that discussed about the Figure.

All equation that mentioned in body paragraph should be written as Eq. (1). Please use Microsoft Equation in order to present an equation. The font size of equation is 10. Each equation must be numbered.

Table 1: This is a Simple Example

Column 1	Column 2	Column 3
A	1	5
B	2	6
C	3	7
D	4	8

(a)

(b)

Figure 1: Figure Quality a) Clear b) Clear

4. CONCLUSION

Make sure that you end your paper with a Conclusion or Summary or Recommendations section.
